SAIGON, July 25 (UPI) - Viet ending at noon today, spokesmen in Saigon said.

The U.S. Command also announced today it was discontinuing, effective immediately, its morning battlefield communique and henceforth would issue only a singla afternoon release to newsmen in Saigon.

Spokesmen said the decision was made because of the "low level of activity involving U.S. forces" in South Vietnam. In action yesterday, South Vietnamese troops reported kill-

ing 23 Communists in clashes ranging from the edge of the Demilitarized Zone in the far north to the southwestern tip of the country.
None of the engagements in-

volved more than minor skir-mishing, they said. Most of the fighting took place in the north along the DMZ defense line west of the town of Gio Linh and less than a half-mile south of the

U.S., China Cautioned By Russia Anti-Soviet Link Warned Against

By Bernard Gwertzman

MOSCOW, July 25 (NYT).— The Soviet Union said today that it seeks better relations with Com-munist China and the United States but warned both powers against anti-Soviet collaboration. In the first official response to President Nixon's projected trip to China and the latest turn in Chinese-American relations, Pravda, the Communist party paper, indicated that the Kremlin was concerned over the implications of a rapprochement between its main world rivals but for the moment at least had chosen not to condemn the developments.

The Prayda article, distributed in summary form early this morning by Tass, was signed by Igor Aleksandrov, a pseudonym used on important policy articles. In tone, the Soviet position seemed considerably more sophisticated and conciliatory than a Bulgarian press agency commen-tary that was reprinted here earlier in the week and had been the most authoritative response.

Ready to Cooperate "The Soviet Union, as before, is ready to vigorously cooperate with all states, the People's Republic of China and the United States among them, for the sake of strengthening universal peace, for the sake of the freedom, independence, progress and prosperity of all the peoples," Pravda sald, Regarding the moves to normalize Chinese-American relations,

"We proceed from the fact that the political decisions of states must be aimed not at complicating the international situation but rather at easing tensions. Undoubtedly, the long-term interests of the peoples of the People's Republic of China and the United States, just as the interests of all the peoples of the world, require decisions promoting stronger peace and security and not political combinations such combinations, as historical experience teaches, in the long run turn against their initiators.

The Soviet assessment noted that only "the further development of events" will reveal Pcking's and Washington's "true intentions."

"Our party and state will take into account all the possible consequences of the Chinese-American contacts. It goes without saying that any designs to use the contacts between Peking and Washington for some 'pressure' on the Soviet Union, on the states of the Socialist community, are nothing but the result of a loss of touch with reality."

The basic line of the article seemed to jibe with what senior Western diplomats had predicted-accaptance of normalization in Chinese-American ties so long as it was not directed against

Moscow. The 24th Soviet Communist party congress in fact had specifically called for better relations with China and the United States. And the Pravda article

referred to this. No Sensation Seen

Reflecting the Kremlin's desire to assuage any concern of its people about the implication of the improvement in Peking's ties with Washington, Pravda said. "Nobody here in the Soviet Union sees in the Chinese-American contacts any cause for sensation. "Soviet people regard these contacts from the viewpoint of the Marxist-Leninist analysis of the international situation and the basic tendencies of its development that was made at the 24th congress," it said.

Will Seek Tariff Legislation

Nixon to Support Romania As a 'Most Favored Nation'

By Tim O'Brien

WASHINGTON, July 25 (WP). -The Nixon administration has capped a two-year effort to improve relations with Bucharest by deciding to support legislation that would grant Romania status as a "most (avored nation."

Romania, widely believed to have played an important role in arranging the visit of presi-dential adviser Henry Kissinger to Peking, has been seeking improved trading term with the United States ever since Mr. Nixon's trip to Bucharest in August 1969. Trade topics were also discussed when Romanian President Nicolse Ceausescu and Mr. Nixon met in Washington

If Congress grants Romania most-favored-nation status would allow the President to provide that U.S. tariffs on Romanian exports to the United States will be no higher than those on the same Items for any other nation. Only two other Communist countries-Yugoslavia and Poland-today enjoy such preferential treatment.

Letter to Sen, Long

The President's decision was learned through a letter written by Assistant Secretary of State David M. Abshire to Sen. Russell Long., D., La., and made public yesterday, Sen. Long, chairman of the Senate Finance Commitof the Senate Finance Committee, had requested guidance last April 16 from the administration April 16 from the administration after Sen, Walter Mondale, D., Minn., and Sen. Edward Brooke, R., Mass., introduced legislation to give Mr. Nixon authority to work out preferential trace agree-ments with Romania.

The State Department letter said most-favored-nation (MFN) treatment for imports from Romania, along with those from other Communist countries fexcept Yngoslavia), was withdrawn pursuant to Section 5 of the Trade · Agreements Act of 1951, but was restored to Poland in

"The administration would not, however, object to this particular bill since it provides discretionary authority to the President to negotiate agreements to extend MFN treatment only to Romania." the letter said.

The letter also said negotiations for Romanian entrance into the General Agreement on Tariffs and Trade "are near completion." GATT is a treaty organization

Boy's Death

land, July 25 (AP).-A nine-yearold boy died under the wheels of a British Army truck today, setting off yet another riot in Northern Ireland. Rioters in Londonderry's Roman

Catholic Bogside district immediately set fire to the truck and forced back three armored cars that tried to rescue lt. Eyewitnesses said that the

truck skidded on wet roads during patrol of the Bogside area. Troops fired rubber bullets to disperse the crowd that quickly The incident followed raids by

police and troops on more than 100 homes of suspects of the out-lawed Irish Republican Army, which has sworn to end Northern Ireland's links with Britain. Three Charged

Forty-eight persons were hrought in for questioning. All but six were soon released. Three of the six were brought hefore a court today and charged with possessing subversive literature. Later today, nine policemen

were reported injured when hundreds of football fans leav-ing a match at Casement Park, Belfast, pelted them with stones. One injured police motorcyclist abandoned his vehicle and the crowd set it on fire. They also stoned two armored cars but no soldiers were hurt.

Later, an estimated 300 persons began bullding harricades at nearby Owenvarragh Park. In Belfast, meanwhile, 40 Prot-

estant families left their homes. They said that they had been under fire during tha last week from the neighboring Falls Road area, a Roman Catholic stronghold.

The provincial prime minister, Brian Faulkner, told a rally of his Protestant-based Unionist party that security forces were on the offensive against the IRA's urban guerrillas. "They will be sought out; they

will be harried, they will be brought to justice," he said.

Syria Closes Its Frontier With Jordan

DAMASCUS, July 25 (UPI).-Syria announced tonight it is closing its border with Jordan to protest the Amman government's "liquidation" Palestinian guerrillas and its refive days after President Nixon announced his decision to visit peated shelling of Syrian border villages

An official spokesman, quoted by Syria's Arab News Agency, lation that Mr. Nixon chose this said a number of Syrian citizens were killed or wounded in the vehicle to express his appreciation to Romania for helping pave the road for the recent relaxashelling.

Syria is the second Arab country to close its border with Jordan following heavy fighting between King Hussein's troops and the guerrillas. Iraq did so last week. It also closed its airspace and dropped diplomatic it is believed he was seeking, among other things, to signal to relations to charge d'affaires

Meanwhile, Eing Hussein flew day official visit and talks with King Paisal.

Palace sources in Ammai, said the Hussein-Faisal talks will concentrate on the "current situation in the Middle East and developments in the Arab world." King Hussein originally planned a trip to Saudi Arabia, Egypt. Iran and the Persian Guif, but the Iran and Gulf trips were postponed until October, the sources said.

His Cairo visit, which was to have taken place Friday, was postponed at President Anwar Sadat's request on grounds that anniversary of the Egyptian revolution and ministers would be too busy to give him their full attention. Mr. Sadat Friday launched a

bitter attack on Hussein, accusing him of liquidating the Palestinian guerrilla movement in Jordan.

Foor Flee to Israel TEL AVIV, July 25 (AP).—Four more Arab guerrillas fleeing Jordan's crackdown surrendered to-Israeli border forces yesterday, the military announced

8 Leftists Executed By Sudan More Face Death, Reds Rounded Up

From Wire Dispatches KHARTOUM, Sudan, July 25

A 15-man firing squad today executed Maj. Farouk Osman. Hamadallah, Ee was the eighth man to be put to death in three days for their leadership of last Monday's leftist coup that ousted Maj. Gen. Gaafar Numeiri as Sudan's head of state until an army countercoup Thursday

Expected momentarily to be executed is Lt. Col. Bahakr Noor, who had been named president of the leftists' short-lived Revolutionary Command Council. Col. Noor who was condemned to death by one of six special "swift justice" courts today, had been taken off a British Overseas Airways Corp. jetliner with Maj. Hamadallan on Thursday morning by Libyan authorities.

Britain protested strongly the action of Libya, which Britain said threatened the BOAC plane to make it interrupt its flight to Khartoum and land at Bengharl. Libya maintained that it had merely permitted the VC-10 to land because the Khartoum airport was closed. But today Gen. Numeiri publicly thanked Libya for handing over Col. Noor and Maj. Hamadallah, and he expressed gratitude for other Libyan aid and Egyptian cooperation in snuffing the leftists' power grah.

Gen. Numeiri indicated today that he expected the number of executions to reach 12 or 13. But yesterday he had said that 400 persons, 100 of them army officers, had been accused of joining the leftists' coup, and that the ver-dicts of the six special military courts "will tend toward execution due to the horrifying nature of the crimes they committed."

Today a government minister said that more than 1,000 elleged Communists and sympathizers were now in custody in the Numeiri-ordered roundup of all known Communist party members. The minister said more than 10,000 might be in custody within three or four days. "There will be no more Sudanese Communists wandering around," he stated.

90% Neutralized Gen. Numeiri said today that

already more than 90 percent of the Communist party has been "neutralized" since his resumption of government reins. Gen. Numeiri, wearing a pistol

and a military uniform with four rows of ribbons, rejected today a British government request for clemency for Col. Noor and Mai, Hamadellah, He said they were Sudanese citizens and must be punished for "treason." The request was part of Brit-

ain's pro-forma note congratulating Gen. Numeiri on his retention of power in this largest African nation, a land of 967,500 square miles inhabited by an estimated 15.8 million. Many other such congratulations poured in from around the world, but the key political development in the wake of the countercoun was the pledge by Gen. Numeiri that he would, after all, take Sudan into (Continued on Page 2, Col. 2)

Egyptian War Minister Says Forces Could Defeat Israel CAIRO, July 25 (UPI).-War

Minister Mohammed Ahmed Sadek said todsy Egyptian armed forces are capable of liberating occupied Arab territory. He also declared that Egypt has "the world's most modern air

defense system." Speaking to the political sub-committee of the Arah Socialist Union Congress, Gen. Sadek singled out for praise the air force, "which has gained in efficiency with great speed."

"Sadek emphasized anew the ability of the armed forces of the United Arab Republic to perform their duty in the battle of

Agnew Golfs With Hassan Of Morocco

Entertained by Pool Where 97 Were Killed

RABAT, July 25 (NYT).—King Hassan II of Morocco gave an outdoor luncheon for Vice-President Spiro T. Agnew yesterday in the same setting where 97 guests at the king's birthday reception were slaughtered in an abortive coup two weeks ago.

The king's cool re-creation of the scene—buffet tables on a Saturday afternoon, set hy the swimming pool of the seaside Skhirat Summer Palace—caused some apprehension among the Vice-President's party and the newsmen preşent.

Mr. Agnew's official visit to Morocco had already been cut to one day from two days for se-

However, the hour-and-a-half visit to the palace passed without The staging of the luncheon was seen as an attempt hy the 42-year-old monarch to demonstrate to his American guests that Morocco is under

Late this afternoon, Mr. Agnew played nine holes of golf with the king, who is as enthusiastic a golfer as the Vice-President. Tonight Mr. Agnew was the host at a stag dinner for Moroccan officials at the American Embassy

Tanned and Relaxed

Mr. Agnew, tanned and relaxed after his golfing vacation in Spain, appeared completely at ease in his talks with the monarch. The Vice-President flew here this morning from Camp Sotogrande, a Spanish golfing resort, and he will return there for an overnight etop tomorrow before concluding his round-the-world tour with a visit to Portugal.

[Mr. Agnew arrived in Malaga, Spain, by air today after his 24-hour visit to Morocco, Reuters reported.]

The eccurity arrangements for the Vice-President's visit to Morocco were the tightest of his tour. More than a dozen Secret Service men stood near him at Skhirat Palace. Moroccan troops surveyed the route of his motorcade while a helicopter fluttered overhead. Highways were cleared for his

The Vice-President was met at Rabat airport by the seven-yearold Crown Prince Sidi Mohammed, the son of Hassan, and by the king's brother Prince Moulay Abdullah, who was wounded in the coup attempt. His left arm was in a cast, and he wore a

black eling.
As a gesture of concern for Mr. Agnew's safety, the prince and the crown prince drove with the Vice-President in a bulletproof limousine to the Rabat Hilton Hotel.

American and Moroccan flags were prominent along the route. But as in all of Mr. Agnew's stops on his tour, no great effort was made to turn out the people to greet him.

In an arrival statement which was released but not read. Mr. Agnew said his visit "reflects the importance the United States attaches to Morocco and North Africa in world affairs." He hailed Moroccan efforts at economic development and pledged U.S. assistance "within the limits of our

SALT Trip Cut Short

Eight Leftists Are Executed By Sudanese

(Continued from Pege I) the federation of Arab republics that will be formed by Egypt, Libya and Syria Sept. 1. He said that Sudan will join the federation in January, after necessary constitutional and legal ground-

He thanked the Libyan people for demonstrating in the streets to show their support of him last week and he said of the Libyan head of state: "I cannot forget what Col. Moamer Kazafuy dld by arresting the leaders of the coup who were on their way to the Sudan, and I thank him."

He also thanked Egypt, which he said had arranged to transport an estimated 2,000 Sudanese troops from the Suez Canal to Khartoum. He said that the leader of the 2,000, Defense Minister Khaleb Hassan Abbas, broadcast via Libyan radio facilities a message to Khartoum that pro-Numeiri troops would be arriving, and this stimulated loyalists in the army at home to make a "swift move" against the leftists, making the troop shift from the Suez Canal unneces-

Sadat Boast

Other evidence of Egyptian support included a weekend speech by President Anwar Sadat that his proposed Arab federation showed it had "very sharp teeth" during Gen. Numeirie troubles in Sudan, and a visit to Khartoum by Egyptian Vice-President Huseein el-Shafie. He delivered a check for £50,000 in Egyptlan currency for the relatives of those killed in the Thursday countercoup here. Gen. Numeiri today put the toll at 38 dead, including seven civilians, and 119 wounded, both military and civilian, but come reports have suggested a death toll as high as

Gen. Numeiri yesterday nounced Iraql support of his leftist enemies—Iraq was only nation to recognize leftist junta—and in effect he broke off relations with Baghdad, ordering its embassy here closed and summoning his diplomats home from Iraq. Gen. Numeiri said the Sudanese people still felt a strong brotherliness for the Iraqi people, and he wished the called their nightmare under the

present Ba'athist government. The mestermind of last Monday's coup was reported yester-day by Al Ahram, the semi-official Egyptian newspaper, to have been Abdul Khalek Mahjoub, secretary-general of the Sudanese Communist party. The newspaper said that he had plotted while hiding in the Bulgarian Embassy in Khartoum, enlisting the milltary might of army dissidents whom the Sudanese Communists planned to eliminate after a successful takeover. Bulgaria denied the charge, saying he was never

given refuge in its embassy. Gen, Numeiri said that he has documents proving Iraq's complicity in the Sudanese leftists' plotting -- including one paper referring to the dispatch of an aircraft with supplies for the anti-Numeiri forces, a plane that no one in the Sudanese forces ever found a trace of. Iraq denied the complicity in the plotting, but it acknowledged the break in ties with Sudan, recalling its envoy and formally asking the

Sudanese diplomats to leave. Gen. Numeiri said rumors that other foreign nations had been involved in the leftists' plotting remained only rumors. He said such reports mentioned the United States, Britain and the Soviet Union, as well as Bulgaria. He said investigations would be made, and if any rumors were substantiated, Sudan would pub-licize the facts.

American spokesman said that the 65 U.S. citizens known to be in Sudan have all been accounted for as safe. Britain previously said that all 400 of its nationals here were safe.

taken for cremation," said Salva-tion Army Maj. Eva Den Haitog, of The Hague.

The hospital-composed of two tent wards-has room only for 70 patients, most of them children suffering from malnutrition which has become very serious in the past week because of a shortage of milk powder and protein-rich foods in the refugee camps.

Statistics are not available on how many deaths there are each day among the 7 million refugees. But in the Barasat hospital, which serves a nearby relief camp housing 7,000 refugees, about ten persons die each day, according to Maj. Haitog.

As soon as their bodies are removed, more refugees are brought to the hospital to be treated but, in most cases, they

When a cholers epidemic struck the refugee camps in May, doctors were able to control the disease with a mass inoculation campaign and the injection of life-saving saline fluids into the victims. But, for malnutrition, there is little that can be doneto provide high-protein foods. You can't buy the food locally even if you have the money. said Maj. Haitog, who served in the Congo with the Salvation Army from 1959 to 1971 and visited Nigeria during the civil war with

"This is worse than what happened in the Congo and in Biafra," she said. "When the refugees came to us in the Congo, you could see them get better. Here they get worse; it's just too

Maj. Haitog said that one way to help prevent malnutrition from developing among the refugees would be to build large field kitchens near the border. But with about 40,000 refugees entering India daily, the government has been faced with the more pressing task of finding shelter for the new arrivals.

To Calcutta

Most camps stretching from the border to Calcutta, 70 miles away, are already overcrowded, and new refugees squat along the roads or in thatched huts they build themselves.

Many children soon develop bloated stomachs, symptoms of both mainntrition and worms. Their stomachs are just being eaten up," said Maj. Haitog, a nurse who also serves as a doctor at the Salvation Army hospital because of a shortage of local

For four days last week, the hospital was without any Indian nurses, Maj. Haitog said, as new volunteers were awaited.

Maj. Haltog entered India five weeks ago on a three-month visa. She said she would like to remain longer but is uncertain whether the Indian government will permit her to do so.

The government announced two ago that it would like forelgn volunteers withdrawn, saying there is 'no dearth of Indian doctors and nurses."

Rice Crop

WASHINGTON, July 25 (AP).
-East Pakistan's vital rice crop is expected to fall 19 percent below estimates over the next year,

a government study reports.
A field report from the Agency
for International Development released Friday says rice production for the current fiscal year is estimated at 9.64 million tons. this is 12 percent short of the estimated figure for the last fiscal year, 18 percent under the record 1970 crop and 19 percent below the long-run trend, which wes figured on the basis of average yearly growth since 1960.

Russian Press Doesn't Brand Hoax a Hoax

MOSCOW, July 25 (AP) .- A Soviet newspaper and the government news agency Tass have carried stories on the National Review report last week about 'secret" Pentagon documents, but Soviet readers have not been told the report was a hoax.

A day after the editor of the National Review, William F. Buckley jr., declared the "secret" U.S. government documents published by his magazine were written by his staff, the Soviet Defense Ministry newspaper Krasnaya Zvezda (Red Star) carried a lengthy report on the "Vietnam Plans."

Under the headline "Horrible Plans," the newspaper reported much of the National Review article, stressing the discussion on contingency plans for the use of nuclear devices. Tass also carried a report in its international and domestic service on the National Review documents,

Neither Krasnaya Zvezda nor Tass has reported Mr. Buckley's uent acknowledgment that the documents were a spoof.

Apollo's Service Tower Rolled Away

3 U.S. Astronauts Are Ready To Take Off for Moon Today

(Continued from Page I) voyage of Apollo-15 is bigger, bet-

ter and more ambitious, We're ready to step off on what is our largest mission to date in terms of exploration," Apollo program director Rocco A. Petrone said today. "We have designed Apollo-15 so that exploration plays the key role in the mis-

The three astronauts will reach the moon on July 30, with Col. Scott and Lt. Col. Irwin touch-ing their landing craft Falcon down in the Marsh of Decay at 6:15 pm. EDT, Maj, Worden will remain in the command craft Endeavour and begin an unprecedented six days of photography and experimentation in

67 Hours on Moon

Col. Scott and Lt. Col. Irwin will spend 67 hours on the moon's surface, double the time any previous landing crew has stayed. Most important, they will be the first astronauts to use ground transportation—a fourwheeled electric car known as the

Driving the rover around means that Col. Scott and Lt. Col. Irwin will; expend less energy than the walking crews before them. This means their oxygen and cooling water backpacks will be able to support them for at least 20 hours outside their spacecraft, which is more than double the time any other crews spent working on the

The longer stay means Col. Scott and It. Col. Irwin will go outside their landing craft three times, exploring in the rover over a total distance of 22 miles. Their first traverse will cover five miles, the second a little over ten and the

third just under seven.
Their primary goals are to col-lect rock samples and take detailed photographs of a cliff known as the Apennine Front and of the mysterious Hadley Rille. which winds around a valley of the Apennine Mountains for 84

Gigantic Collision Scientists think the Apennine

Front was lifted up from the surfece by the same gigantic collision that created the mile-wide basin called the Sea of Rains.

Eampling the front should therefore tell the age of the mountains and the age of the Sea of Rains. It should also reveal the composition of the depths of the moon, since the mountain range is made up of material that was thrown up to the surface from below.

The origin of the Hadley Rille is far more of a mystery to scientists, some of whom think it was formed billions of years ago by a rushing river the size of the Rio Grande.

However, most scientists believe the rille was formed by flowing lava, which poured ont of sublunar volcances north of the landing site and then dried up. The rille itself is thought to be a lava tube that collapsed when the lava etopped flowing. Coi. Scott and Lt. Col. Trwin

will leave the surface of the moon Aug. 2 but they will etay with Maj. Worden in the com-

Italian Beaches Shut Because of Pollution

SALERNO, Italy, July 25 (AP). -Seven beaches on the soothern end of the picturesque Amaifi Coast stretching from Salerno to Sorrento were closed yesterday because of pollution.

The beaches were in or near Vietri sul Mare, near Salerno. Authorities ordered them closed because of pollution from hospitals and sewerage. Recently, seven beaches in the Naples area were shut because of pollution,

To Frighten Off Tourists MADRID, July 25 (Reuters) .-

Cholera Fails

Foreign tourists poured into Spain this weekend, following reassurances by Spanish health anthorities that there has been no new outbreak of cholers following seven mild cases in the remote Jaion valley of Zaragoza Province. At the Junguera border post, on the Spanish-French frontier north of Barcelona, cars crossed into Spain at the rate of 35 s minute yesterday. Departures were normal for this time of year.

[French consular authorities in cholers immunization is required for all travelers, without distinction of nationality, heading from Spain into France, the Associated Press reported. Earlier Paris sources had said such certificates would not be required until

Outbreak 'Strangled'

In Zaragoza, health authorities reported that the cholers outbreak had been "definitely strangled." The seven cases have completely recovered, they said, and no new case has been discovered.

Local health officials said 435 eople with summer diarrhea have recently been admitted to

a hospital in the Jalon valley zone. Normally they would not have entered a hospital, but officials were taking no risks. Doctors said one of the problems is that many of the villagers

in the Jalon valley, an under-developed region, do not have running water in their bomes Water From Wells

They take water from wells, from the Jaion River, from canals," a doctor told Spanish reporters. "They let it stand, and then they drink it."

Water throughout the zone has since been chlorinated.
Some 2,500 doctors, nurses and student volunteers have vaccinated more than 500,000 people against cholera in Zaragoza Province. Spanish health authorities have said vaccinations are not necessary in other parts of Spain. More than two million foreign tourists were estimated to be in Spain this weekend. They included more than 800,000 French, 240,000 West Germans, 250,000 Britons, and 40,000 Italians.

5 Gaza Guerrillas Killed by Israelis

GAZA. July 25 (AP).—Israeli troops killed five Arab guerrillas today in a biszing gun battle in the corridors of a Gaza City girls' preparatory school, the military said.

A epokesmon sald security forces, acting on a tip that guerrillas were hiding in the school, surrounded the building shortly before dawn. The Arabs refused to surrender,

and troops, firing automatic weapons and hurling grenades, broke in and killed them in a short, sharp encounter, the epokesman said. There were no Israeli casualties in the clash,

Lebanon General Killed in Crash

BEIRUT, July 25 (UPI) .-- The nese Army, Gcp. Jean Njeim, was killed today in a helicopter crash in north Lebanon, military sources

Gen. Njeim, 56, was on his way back to Beirut from the presidential summer residence at Ehden, when his helicopter crashed.

President Suleiman Frantieh has ordered an investigation of the crash, the sources said. Preliminary investigations ruled out sabotage and attributed the crash to a technical fault, the sources

To Insure Arsenal Reliability

Underground Atomic Tests W Still Needed, Pentagon Says

By John W. Finney

WASHINGTON, July 25 (NYT). The Defense Department is now contending that nuclear

testing must be continued to assure the reliability of the U.S. atomic argena! The Pentagon has used this argument to convince first the Johnson administration and then the Nixon administration that the principle of a comprehensive ban covering underground tests

should not be accepted. Friday, Dr. Carl Walske, assistant to the secretary of defense for atomic energy affairs, presented the Pentagon's case in testimony before the Senate For-eign Relations subcommittee on disarmament.

During the two days of hearings by the subcommittee, headed by Sen. Edmund S. Muskie of Maine, there has emerged the first clear-out picture of the at-titude that the administration has adopted on nuclear testing since the Geneva disarmament conference resumed consideration of the issue of extending the ban to cover underground testing. Inspection Demand

While the administration has endorsed a comprehensive ban on testing that is "adequately verified," it insists on on-site inspections to do the verifying. This condition is unacceptable to the Soviet Union, And the Defense Department appears more opposed than ever to abandoning underground tests — the only available method it has for de-veloping and "proof-testing" atomic weapons.

Since the limited ban on test-ing went into effect in 1983, tha Pentagon and the Atomic Energy Commission have conducted 233 underground tests, a faster rate than before the treaty, which only prohibits tests in the atmosphere, space or under water. Without continued testing, Dr. Walske testified, greater uncertainty would develop about the reliability of the nuclear weapons that the United States was relying on to deter a Soviet attack. He said that a "destabilizing" sit-uation could develop should the United States decide that some of its weapons were unreliable and the Soviet Union discover that fact.

Monitor Needed

Dr. Walske said that the Defense Department believed that some on-site inspections were still necessary to monitor a ban on underground tests. This position is accepted by the Arms Control and Disamment Apency

Even with recent advances in seismic detection the Pentagon official estimated that there would be 25 seismic disturbances annually above 4.0 magnitude on the Richter scale that could not be definitely identified as either earthquakes or underground explosions. He estimated that there would be two or three unidentifiable seismic events annually above 4.5 on the Richter scale in the

A seismic event of 4.0 magnitude is produced by an atomic explosion of 1.5 kilotons in hard rock and 12 kilotons in alluvium or volcanic matter. A magnitude of 4.5 corresponds to a 6-kiloton explosion in rock and 45 kilotons in alluvium. A kiloton is the equivalent of 1,000 tons of TNT. The bomb dropped on Hiroshina was about 20 kilotops.

The Pentagon's interpretation of recent seismic advances was disputed on technical grounds by Dr. James N. Brune, a seismologist at the University of California at San Diego, and on po-litical grounds by Adrian S. Fisher, former deputy administrator of the Disarmament Agency and now dean of the Georgetown University Law

Dr. Brune testified that there was a "widespread" feeling among selsmologists that recent advances should make it possible to detect and identify all seismic events in the Soviet Union down to a magnitude of about 4.0. In a statement to the subcom-

mittee, Mr. Fisher, once a de-fender of on-site inspection, said. "It is no longer plausible to hold that on-site inspections are necessary to provide adequate assurance that a significant num-

USAF Sergeant Held for Spying BANGKOK, July 25 (AP).-A

U.S. Air Force sergeant stationed in Thailand has been arrested and flown to an American air base in the Philippines on charges of conspiring to commit acts of esplonage with a Communist power, U.S. officials said today. The airman was identified as

Master Sgt. Raymond G. de Champlain, 39, of Lisbon, Conn., and was with the U.S. Military Assistance Command in Thailand. He was arrested with the help of That police earlier this month for attempting to pass classified information to two Soviet officials, who have since left the country.

Envoy From China

Arrives in Ottawa OTTAWA, July 25 (NYT).-Huang Hua, China's first ambassador to Canada, arrived here Friday pledging that he and his colleagues would "do our utmost" to develop friendly relations between the two countries.

He was greated by representatives of the Canadian External Affairs Department as well as 50 members of Ottawa's Chinese Community, including many children waving Canadian and Chl-

ber or tests above this level are so not being carried out."

The potential gains from any of clandestine test; below the deter of tion threshold, he said are out ficiently marginal that any risks in a comprehensive test ban ap-pear slight compared to the risk of proliferation and an ever escalating arms race supported by massive underground test pro- sil

U.S. Inquiry

State Deaths

Congressmen Seek

Federal Jury Probe

WASHINGTON, July 25 (NYT).

—A quiet and thus far unsuccessful campaign is being waged by

congressmen to persuade the Justice Department to begin a

federal gran I jury investigation of the shooting of 13 students by National Guardsmen at Kent

State University.

The disclosure of the appeals

from a number of senators and representatives was prompted by

a report released Thursday by a branch of the United Methodist

Chnrch. The report put forward

the theory that a small group of Guardsmen had agreed in ad-

a prearranged signal from a ser-

The shooting, in which four of

the students were killed took place during campus disorders at

the northeastern Ohio school on May 4 of last year.

Friday that a decision on the matter, which has been under investigation for nearly 15 months, would be announced "soon," but not before Attorney General John N. Mitchell returns

The first of several appeals to the Justice Department was made last May by a group of 20

congressmen, headed by Reps. William S. Moorhead of Penn-

sylvania and Charles A. Vanik of

Ohio, both Democrats, who said in a letter to Mr. Mitchell that

they believed "serious questions"

about the incident remained un-

In a statement released arrough UTO headquarters yesterday, union president Charles Luna said that union members would "peacefully withdraw their services in pursuit of a national agreement" from the five latest

Soviet Figure Victor Louis Visiting U.S.

By Dusko Doder

WASHINGTON, July 25 (WP) ist believed to be associated with Soviet intelligence organizations and frequently used by the Soviet government to perform deli-cate missions abroad, has arrived in the United States on a "privisit, it was learned here

The U.S. government's decision to issue a visa to Mr. Louis prompted speculation among experts on Soviet affairs as to the nature of his trip.

Mr. Louis made a surprise visit to Israel last month and conferred with Simha Dinitz, political adviser to Premier Golda Meir. The fact that Soviet anthorities had sanctioned the trip indicated Mr. Louis may have been used to establish unofficial contacts with Israel. The Soviet Union broke diplomatic relations with Israel after the June, 1967, war.

Teache d Mr. Louis visited Taiwan two ement # 8 ber of Chiang Kai-shek's Chinese ected a mathonalist party in an apparent effort to re-establish contacts between Moscow and Taipel.

Whereabouts Unknown

of Ger We-Tas a me the Mr. Louis's whereabouts in the United States could not be immediately determined. Reliable sources said he arrived this week and planned to visit Boston, New to counter York and possibly Palo. Alto. Calif, before coming to Washing-

. Huong State - Department - spokesman il ligure his Charles Bray confirmed yesterday without the decision to issue a 20-May visa to Mr. Louis was made Miles States." When we is - sued him a visa wa were satisfied that he had legitimate private business here."

had no appointments in the State Department or elsewhere" in Washington. He would not comment on the nature of Mr. Louis's "private business."

Mr. Louis, whose real name is Vitaly Yevgenyevich Lai, is accredited in Moscow as a correspondent for the London Evening News, but he rarely writes for newspaper. He told reporters that he went to Israel for medical treatment and that his trip had "nothing to do with the Soviet Union's establishing relations with Israel."

. Few experts take his explanation of the trip at face value. An ordinary Soviet citizen cannot visit Israel Mr. Louis had also visited Spain, which has no reintions with Moscow, and his visit to Taiwan angered China, which accused the Russians of plotting.

Svetlana's Book

Mr. Louis aroused - interest nhers abroad when in 1967 he sold an unanthorized manuscript of Svetlana Alliluyeva's book and a series of previously unpublished photographs of Stalin. His name also has been linked with the book "Khrushchev Remembers." Mr. Louis was the first person

to reveal the ouster of Nikita Khrpshchev in 1964. In 1969 he have a story about Soviet plans to attack Chinese military installations in Central Asia, a maneuver obviously calculated to rattle

At 43, he is an urbane and syming gentleman who can often be seen on Moscow's diplomatic cocktail circuit. He and his British wife, whom ha met in Moscow, live on a lavish scale in a mansion 15 miles outside the

Soviet capital.

He also maintains a five-room Sterement in the city owns Posseke and maintains a swimming pool and tennis court at his country estate. The source of his income remains a mystery.

strike action were the Chicago. Rock Island and Pacific; Chicago Milwaukee, St. Paul and Pacific; Missouri, Kansas, Texas; Baltimore and Ohio, and Chesa-peake and Ohio Railroads.

July 16

The UTU started selectively striking railroads to back demands for a national contract settlement July 18 with strikes against the Union Pacific and Southern Railroads. A strike against the Chicago and North Western Railroad was halted by federal court order, and a privata settlement was reached with the

The nation's railroads then retaliated by introducing changes in work rules that have been the major block to a national settle-ment. The union promptly served two more railroads with a strike notice to protest the "uni-lateral" changes, which Mr. Luna charged amounted to "a thinly disguised lockout."

Sieel Cutbacks PITTSBURGH, July 25 (UPI). -With just a week remaining

before the current three-year contract covering 450,000 steelworkers runs out, cutbacks in production were being made today. Wheeling-Pittsburgh Steel Corp., the nation's ninth largest producer, began a complete shutdown today. Eventually, 17,500 employees will be affected.

Inland Steel Corp., fifth largest producer, will begin banking blast furnaces and reduce steel manufacturing in open hearth furnaces Tuesday at its Indiana Harbor works, East Chicago, Ind., where 22,000 persons are employed.

Armco Steel, seventh-ranked steelmaker, will lay off 250 regular employees this week at its Ashland, Ky., works, U.S. Steel Corp., the nation's

leading producer, banked three of 20 coke batteries at its Clairton works near Pittsburgh, saying demands for coke have dwin-

Meanwhile, negotiators and the USW continued secret contract talks in Washington.

Dock Situation

SAN FRANCISCO. July 25 (AP).-Government intervention is being sought to halt a threeand-a-half-week-old dock strike which threatens to cripple the U.S. Pacific Coast.

The longshoremen's strike has become a nightmare," Oregon Gov. Tom McCall said in a mesasking President Nixon to use his power to end the strike. No talks have been scheduled since the International Longshoremen's and Warehousemen's Union and the Pacific Maritime Association-representing 120 emloyers-broke off contract nego-

Stewardess, Male Passenger Shot in Hijacking to Cuba

From Wire Dispatches
MIAMI, July 25.—The day after
the first fatal shooting of a U.S. aerial hijacker, another man yesterday used a small pistol and a stick of dynamite to divert a Miami-to-Jacksonville flight to Cube. He slightly wounded a stewardess and a male passenger with a shot he apparently fired

At Havana, authorities disarmed the hijacker and led him away to an unknown fate. They applied bandages to the finger wounds of stewardess Sue Bond, 29, and the graze on a leg of passenger Larry Evans, then cleared the National Airlines DC-8 jetliner for its return flight, with 82 aboard, to Miami.

On arriving back here, Miss Bond and Mr. Evans were taken to a hospital for treatment. Neither was reported seriously

Miss Bond said the hijackera tall, wiry Spanish-speaking man -burst into the galley to announce the hijack to the three stewardesses. He seemingly panicked when a door to a nearny bathroom opened and he saw Mr. Evans there. The gun went off, nicking the fingers of Miss Bond's left hand and grazing Mr. Evans's

The stewardesses and Mr. Evans locked themselves in the bathroom as the hijacker went into the plane's cockpit, so that no other passengers knew of the shooting until the plane, which had been scheduled to go from Miami to Jacksonville, arrived at

Friday evening, hijacker Richard Obergfell, 28, was fatally shot by an FBI agent using a longrange rifle at Kennedy Airport in New York

Just before the bullet feiled him. Obergfell's hostage, a rookie stewarders, broke from his grasp as he turned to look suspiciously at a nearby parked car. At that moment, they had been walking toward a Boeing-707 which Trans World Airlines was having wheeled out of a hangar to take Oberg-fell to Italy, as he insisted.

The man wanted to go there to see a girl friend, according to his former landlord in Clifton, N.J. Obergiell, he said, had become discouraged with life in the United States because he had been fired from his joh as a United Air Lines mechanic,

Obergfell first hijacked a TWA flight out of La Guardia Fleld, New York, bound for Chicago and Los Angeles. When the pilot said the plane did not have the fuel to go to Italy, the hijacker ordered a return to La Guardia, where commandeered a TWA truck for the four-mile trip to Kennedy. as he clutched stewardess Ida

Miss Concepcion, 21, said afterward that. although she figured would be shot by staked ont FBI men or police when she broke free, she still felt sorry for the hijacker, who had been "polite" to her and "showed a sense of humor." He had said, she reported, "You look overworked and in a need of a vacation. I'm taking you on one, to Italy."

those charged with illicit tun At a news conference in Clucago, James R. Thompson, an assistant U.S. attorney, said the seizures represent "the tip of the

N.Y. Thug's Shot Paralyzes French Student for Life

NEW YORK, July 25 (NYT).

The 24-year-old son of a French industrialist was in critical condition in St. Luke's Hospital to-Side robbery on his first night in New York,

The man, Jean Crez, is paralyzed from the neck down as a result of the assault, which occurred July 17. Mr. Crez has been told that he will be paralyzed for life. He was passing through the city on his way to Paris after completing a two-month business course at Tulane University in New Orleans.

According to the police. Mr. Crez was staying with friends for the night on West End Avenue near 101st Street. Outside the building, about 1:15 a.m., he was accosted by two men who demanded at gunpoint that he take

At the apartment, the man was made to lie on the floor and was robbed of \$58. Then, apparently without provocation, one of the assailants shot Mr. Crez in the back of the head. Detectives are investigating the crime but have as yet made no arrests. The father of Mr. Crez is the head of the Rhodiaceta division

heads. All four called for such of Rhone-Poulenc, a major chem-Ical company based in Paris.

N.Y. Fire Bomb Hits Soviet Car; Jewish Rallying Cry Is Used

NEW YORK, July 25 (AP). -A car belonging to the Soviet mission to the United Nations was slightly damaged early today when a Molotov cocktail was hurled through its windshield.

Incendiary devices missed two other mission cars. No one was injured. The cars were parked near a beach bungalow maintained by the mission in the Far Rockaway section of Queens, police reported.

An anonymous caller phoned the Associated Press before police were aware of the incident and hnrriedly reported the firedone because of "oppression" in the Soviet Union.

The caller used the phrase "Let my people go" and "Never again," rallying cries of the militant Jewish Defense League. Soviet personnel in this country because of alleged oppression of Jews in the Soviet Union. Police said the car, registered

to Michael Globenko, an attaché of the mission, was partly burned. Later today- two more firebombs were hurled at Soviet cars both missed their mark.

Poll by GOP Shows 67 Pct. For Nixon Trip

DENVER, July 25 (AP).-President Nixon's planned journey to Communist China bas the approval of C7 percent of the American people, according to a public opinion survey released by an administration source at a meeting of the Republican Nation al Committee.

The poll, conducted by Opinion Research Corp., showed 20 percent of the 1,002 people surveyed do not consider the Nixon trip a good thing. Eleven percent had no opinion

The survey showed 68 percent of those questioned believed that "more normal relations between the United States and Communist China' will be likely to lead to world peace. Thirteen percent said it would make peaca less likely. and 8 percent said it wouldn't make any difference.

U.S., Brazil 'Too Close' For Senator

By Benjamin Welles

WASHINGTON, July 25 (NYT) -Sen. Frank Church criticized yesterday what he described as "too close" identification of the United States with the current Brazilian government head-ed by Gen. Emilio Garrastazu

Grand Jury have been seriously questioned by the FBI and the Scranton Commission report, Sen. Church, D., Idaho, who heads a Foreign Relations subcommittee on Weatern Hemisphere affairs, said extensive hearings in May showed "no request you to convene a federal evidence" of a direct relationship between U.S. police and military programs in Brazil and 'repressive" activities of the Brazilian government. A report of the hearings was made public yesterday, with all security matters deleted by State and Defense Department officials. These programs, Sen. Church

said, are "not so much iniqui-tous as nullities." American police and military advisers in Brazil appear to have little impact or subsequent control either over Brazillan personnel trained or over the use of the equipment furnished, he said.

whose congressional district in-cludes Pittsburgh, home of Ar-thur Krause, the father of one "I don't believe that the advisers engaged in these programs really do much of anything," Sen. Church declared, "yet the fact that they are present on the scene means that the United States has to pay the political price of · Identification repressive government."

Police Trained in U.S.

William M. Rountree, U.S. ambassador to Brazil, and other of-The call for a federal investigaficials testified that the U.S. pubtion was later picked up by two lic-safety police-training program began in 1959 and is due to be Democratic senators, Edward M. Kennedy of Massachusetts and terminated in 1972. It has cost George McGovern of South \$10 million. A total of 641 out Dakota. In a speech to the Senate last week, Sen. McGovern of 271,000 Brazilian police have been trained in the United States. called the Ohio Grand Jury find-Mr. Rountree and Theodore D. ings "a whitewash of the agents

Brown, the U.S. Agency for International Development's public safety director in Brazil, both denied direct knowledge of torture of suspects by Brazilian authorities, although they acknowledged widespresd reports to this effect. Thay cited State Department expressions of "concern." Both emphasized that U.S. police advisers took no part in interrogations or intelligence work and they stressed that AID bad furnished no electronic surveillance equipment to Brazil.

Maj. Gen. George Beatty, chief of the U.S. military mission to Brazil, and Peter Knauer of the Defense Department disclosed that U.S. military sales to Brazil during the current year were running at \$20 million.. There are hopes that these might be trebled next year if Brazil decided to purchase United States rather than European equipment, they

Sen. Church questioned the necessity for a military advisory staff of 45 U.S. citizens and 15 Brazilians. In an exchange with Mr. Rountree, he also described as "immense" the current U.S. Embassy staff of 588 Americans and 811 Brazilian employees.

Yorty Starts World Trip LOS ANGELES, July 25 (AP). -Mayor Sam Yorty left yesterday on an around-the-world trade mission that is to include France, Romania, Thailand, South Vietnam and South Korea,

Nixon Urges Congress to Act On Lockheed Loan Guarantee

By John W. Finney

WASHINGTON, July 35 (NYT). led by Sen. William Proxmira, -President Nixon, seeking to dispel any impression of a division

The Senate will vote tomorrov within the administration, urged Congress yesterday to pass promptly legislation guaranteeing loans to failing major businesses, on whether to limit the debata by imposing cloture—a motion requiring a two-thirds majority. The first attempt at cloture is expected to fail but will set tha stage for another cloture vote on

Wednesday. Should the second vote fail—and at this point the outcome is uncertain-Sen. Mike Mansfield of Montana, the majority leader, is prepared to put the Senate on a two-track schednle, debating the Lockheed bill part of the day and a campaign reform bill tha rest of the day. The result would be to take some of the pressura off Sen. Proximire and his sup-porters in maintaining a fili-

buster against the Lockheed bill. Some liberal Democrats are also weighing the idea of offering the House-approved welfare reform bill as an amendment to the Lockheed bill. This would permit the Democrats to argue that if the Senate is going to help big corporations, it should also help poor individuals. The parliamentary result would be to greatly complicate the chances for passage of the Lockheed bill before the Aug. 8 deadline imposed by the British government.

The British have threatened to stop subsidizing the bankrupt Rolls Royce Co., which is produc-ing the jet engine for Lockheed's TriSter L-1011 transport, if loans are not provided to Lockheed by Aug. 8. Without the assurance of continued production of the engines, as well as loans to continua production of the TriStar, Lockheed is threatened with bank-

Some Democrats not directly involved in the fight believe the tide has begun to shift against the Lockheed bill, partly because of the impression that there is a division within the Nixon administration over the desirability of the broad legislation.

Secretary of Defense Melvin R. Laird issued a statement yesterday describing as "erroneous" and "unfair" press reports that he and Deputy Defense Secretary David Packard do not support the broad hill before the Senate.

repeated gunfire as they passed through black neighborhoods. He said that police exchanged shots with snipers as firemen fought flames in several vacant houses. He said that no one apparently was hit in the exchange of shots and there were no ar-rests. The fires, Capt. Rand said, apparently were started by firehombs. By 5 am, the officer

said, the city was calm. Yesterday afternoon, about 200 blacks gathered at police headquarters to protest alleged racism in the police department. Police ordered the group to disperse. When the group did not break up, police moved in to make arrests. In the melee that followed, five demonstrators were slightly hurt. Fifteen persons were arrested on various charges ranging from simple assault to

Senate Unit Gets Funds to Probe Viet War Origins

failure to disperse. The violence

spread throughout the city later

last night.

WASHINGTON, July 25 (UPD). -The Senate Foreign Relations Committee, for several years the vanguard of congressional at-tempts to end the Vietnam war. is going to investigate the origins

Without dissent, the Senate approved yesterday a special ap-propriation of \$100,000 for the committee's investigation.

The inquiry is a direct outgrowth of the publication of the classified Pentagon Papers that trace at least part of the develop-ment of U.S. entanglement in Under terms of the resolution

approved yesterday, the inquiry will include a study of the machinery for the making and conduct of foreign policy, congressional access to executive branch papers and personnel and the doctrine of executive privilege under which the President can deny such access, arrangements within Congress for handling foreign policy matters involving national security and procedures for classification and declassification of documents.

Belated—But Reasonable

proposed visit to Peking was belated-but reasonable. The Soviet Union trusts neither China nor the United States, and neither of them trusts the Soviet Union-or the other. So any reshuffling of attitudes within the triangle of suspicion necessarily acts off waves of uneasiness. Nevertheless, all three seem to have come to the conciusion that mutual accommodation can be made on the basis of mutual skepticism.

Such a foundation for international cooperation is far from ideal. It means harder bargaining before acceptable substantive agreements can be reached; it means harsher words than diplomatic politeness normally tolerates: it could mean harsh acts, stemming from fear. But at least it is a foundation, a recognition of the facts of life in a world that has the power to blow itself up and is already in the process of stifling mankind through man's own proliferation.

So, the Soviet Union, while warning against any use of the Peking-Washington axis against Moscow, still gives a cautious welcome to the new relationship. It does not descend to that kind of sioganeering simplification which can see only a plot behind the Nixon adventure—the kind of slogeneering, for example, which, in the very Pravda article analyzing the Sino-American rapprochement, accuses the United Statea of supporting "Israeli extremists." These can be written off as the harsh words that

The official Soviet reaction to Mr. Nixon's arise from mutual suspicion; they have little relation to the facts of a Middle East in which the U.S.S.R.'s ally has just spoken of subjecting the Egyptian people to a miliion casualties unless the war there is ended in Egypt's way.

> What one must hope lies at the heart of the Pravda article is the statement that the "Soviet Union, as before, is ready to cooperate vigorously with all states, the People's Republic of China and the United States among them, for the sake of strengthening universal peace, for the sake of the freedom, independence, progress and prosperity of all peoples." This, like the harsh words, need not be taken at the foot of the ietter to provide a practicable way of reducing world tensions and increasing the habit of working together for at least minimal common goals. Each of the three powers would interpret "freedom, independence. progress" differently: each has its own definition of prosperity.

> The trouble-making potentials of ideological semantics are infinite. But if they can be held in check long enough to provide some kind of infrastructure of co-operation, the possibility that peace-about which there is a good deal less difference of meaning in the various capitals—will be maintained, and shored up, is good. That is the great hope of the Nixon intended journey to China, and that is the at least tentative promise of the Soviet reaction to it.

Japan, China and the U.S.

The abrupt announcement of President Nixon's planned visit to China has cansed acute embarrassment to the government of Japan, imposing unfortunate and largely unnecessary new strains on U.S. relations with its most important ally in Asia,

The new U.S. policy of seeking an accommodation with Peking should not in itself cause serions differences between Washington and Tokyo, although the American-Japanese alliance must inevitably be affected by such a profound change in Pacific relationships. Many Japanese, including some leading members of the ruling Liberal Democratic party, have for years been urging a more realistic approach to the Chinese mainland on the part of both Japan and the United States.

Until quite recently, Japan has in fact been ahead of the United States in seeking openings to Peking. Japanese trade missions have for years visited Peking to negotiate agreements that have fostered a steady expansion of Sino-Japanese trade. Last New, Year's Day, Premier Sato offered to open talks with Peking on the possibility of normalizing relations between their two countries, saying that "Japan has no diplomacy unless we come to grips with the China policy." Mr. Sato even anticipated President Nixon by a month in referring to the mainland government as "the People's Republic of China."

Japan fully shares the U.S. interest in ending China's isolation in order to reduce tensions in Asia, to develop trade and to

engage the Chinese in international efforts to control armaments and establish peace.

But the Sato government has been extremely cautious in its approaches to Peking out of deference to Washington. Resisting strong domestic pressures for a bolder China policy, the premier has repeatedly emphasized that "our relations with the United States are more important to us than those of any other country." The Japanese have firmly adhered to U.S. policy on Taiwan, a policy that has been a principal obstacle to improved relations with Peking for both Washington and Tokyo. Now Japanese officials fear they have been left out on a limb by some secret understanding-which in fact may not exist at all-between President Nixon and the Chinese leadership on the Taiwan issue.

It would be incredibly shortsighted of the U.S. government to make such a sweeping change in its Asian policy without first consulting its principal Asian ally. Premier Sato's protestations of ignorance may re designed primarily to cover his domestic embarrassment over the collapse of his own cautious policies. But the surprise and consternation expressed in Tokyo certainly suggests a gap in communications. Although Japan and the United States have independent as well as common reasons for seeking a new relationship with Peking, the Japanese-American alliance remains the higher priority for both countries. Preservation of that alliance requires close consultation during the negotiations that lie ahead, especially on the critical question of Taiwan. THE NEW YORK TIMES.

International Opinion

Paris Vietnam Talks

The shadowy game took a pathetic turn at the Paris conference on Vietnam. In the uncertain light of Sino-American rapprochement, the North Vietnamese brandished the torch of idependence and sovereignty of small countries in the face of the big ones, but without being able to conceal that they had no other weapon but their determination. This poses the problem of the means available to proteges of China and the United States to make their voices heeded in the major negotiations that have been initiated.

Except for Japan, no country of the American zone of influence has enough economic strength to be able to disregard possible political pressures from its big protector. The elbow room is scarcely wider for states and revolutionary movements sponsored by Peking.

The now-obvious failure of the Paris conference is an illustration of this. The United States did not even respond to the peace pian of the South Vietnam PRG. Since Washington is turning directly toward Peking, itself interested in becoming a recipient, Vietnamese of both sides find them-

scives unprotected if they do not follow. This is what makes so pathetic the affirmation of the North Vietnamese spokesman at the 122d session: "The determination of the Vietnamese people has the additiv of their mountains."

-From Les Echos (Paris). Shipload of Pollution

What made the tanker Stella Maris head back home with her mission of dumping 600 tons of poisonous waste in the Atlantic unfulfilled? Obviously the protests of governments against this pollution of the ocean played their part; but behind them was the growing indignation of ordinary people over modern industry'a casual way with dangerous waste.

The Dutch company concerned was not especially culpable since it seems to have obeyed such rules as exist and was not attempting to pour its unwanted chemicals into the sea by stealth. Evidently others are much less scrupulous.

Perhaps the real value of this one victory over needless pollution is that it has drawn attention to all the other cases in which the polluters do as they please unchecked.

-From the Daily Telegroph (Lonnon).

Even Rome Can Get Lucky

By C. L. Sulzberger

ROME.—Two external events are expected by the highest level of this government to play a significant part in improving Italy's internal situation and strengthening both democratic confidence and economic stability.

These two external events are widely removed from each other. The first is the sudden prospect of vastly improved relations between the United States-and therefore all the West-and China, The second is the likelihood, indeed expectation, that Britain will become a member of the Common Market.

In judging President Nixon's melodramatic gesture toward Peking, Rome is wholly favorable -just so long as it is stressed that it is not an anti-Soviet move and seeks only to create an atmos- and the Communist party anachphere of peace. Nevertheless, it ronistic. With unabsahed adis with the Kremlin appermost miration for Britain's steadfastin its mind that Italy assesses ness, civic sense and long demo-Washington's new China policy.

The unstated bope is that casement of Sino-American strains will fscilitate a speedy end to the Vietnam war and this, in turn, will enable the United States to pay more attention to its NATO defense obligations. There has been ill-disguised alarm here at the steady advance of Russian penetration in the Mediterranean area and it is expected the United States may soon be able to muster greater countervailing pressures.

Added Worry

Italy, as the alliance's central pivot, has been worried about the Soviet push along the Mediterranean's eastern and southern sbores. Malta's new neutralist tinge has added to this anxiety and the relative weakening of the NATO position has been mirrored by a weakening of the democratic parties in Italy's political kaleidoscope. Now it is hoped these trends will gradually reverse.

Simultaneously, the prospect of Britain joining "Europe" is welcomed with immense enthusiasm by the Italian regime. The reasons adduced, moreover, differ significantly from the logic argued elsewhere on the Continent.

In other lands it is pointed out that Britain's industrial, technical, commercial and banking skills plus Britain's sizable population will furnish a weighty increment to the producing and consuming potential of the market. But in Italy the primary emphasis is on Britain's moral contribution. This government calculates

British membership will firmly thrust Europe forward on a new tide of history that may, in the long run, make the revived Neo-Pascist movement here ridiculous cratic tradition, the highest officialdom considers London will bring into Europe "the vitamins

Rome is wise enough to realize that Mediterranean nations since ancient times have rarely shown an aptitude for sensible self-government and feels this injection from pragmatic Britain is needed by Italy because of dehilitating hangover problems from a long tradition of reactionary ciericalism and incomplete unification. It thinks the Germans will likewise benefit because of their ugly post heritage and the uneasy lack of confidence produced by continuing partition: and the French because of their

rather high-handed Napolconic and Gaullist traditions. There is admiration and respect for the British at top levels here. While the Communists often insult the United States, they rarely insult Britain, still secretly re-specting its courage during World

the Hitler-Stalin pact, Some Marxists say they can never forget that Mark and Lenin were once refugees in London.

Wsr II, especially the period of

And it is hoped, rather wanly, that British civic-mindedness will catch on here. This hope is di-rectly related to discouragement with bureaucratic corruption and inefficiency and with the tendency of unpatriotic Italian capitalists to dodge taxes and also to send their money abroad whenever crises threaten,

Social Problems

What this country needs is a period of steadiness and selfconfidence in which to digest the social effects of its impressive industrial revolution during the last 20 years. While other West European

countries have drawn in foreign labor forces—Algeriau, Portoguese, Turkish, Yugoslav—to help their economic progress, the "foreign" labor here consists of backward south Italian peasants. About 10 million of these (in-

ciuding their families), or one fifth the population, have left southern farms for northern cities and brought with them enormous problems of psychological adjustment. They have improved their lot but their housing, schooling and actual job opportunities are iess than those of their northern compatriots who climbed the social ladder when they came. This produced unessiness and discontent just as this huge new element becamo politicized and learned that it could express its wants.

This phenomenon lies at the heart of Italy's contemporary internal problems. Now it sees as a stroke of fantastic luck the chance that sudden external developments will provide a period of internal surcease and adjust-

Hussein Says Israel Is Ousting Christians

AMMAN-King Hussein of Jor-dan warned in an exclusive interview that, if the great powers fail to balt Israel; "extreme injustice" to Christians living in Jerusalem, the historic character of that city "will have changed completely and no peace in Palestine will be possible."

The king, who is perhaps the most stable ruler and closest U.S. ally in all the turbulent Arab world today, told us that 30,000 Christians have been "pushed out of that city, driven out" since Israel conquered the Arab section of the city in the 1967 war, leaving only 10,000 there. The accuracy of that claim could not be confirmed here.

The Israelis, moreover, plan to pack the Arab section of the city. known as East Jerusalem, with new immigrants, particularly those who are now coming at a high rate from the Soviet Union. The purpose, he said, is to make East Jerusalem a Jewish city, a fact of which the world's Christian religious seem to be surprisingly unaware.

The "extreme wrong" being done to the Christian population by the Israeli government, he said, is occomplished by total Israeli control over textbooks, education and housing patterns in Arab Jerusalem. Unable to change these Israeli "administrative practices" and unwilling to submit their children to Israeli-controlled education, Christlian families are leaving Jerusalem for

By Rowland Evans and Robert Novak such places as Brazil and other Latin-American countries.

> In addition, he said, iand owned by Christian families for generations is being "expropriated" for new high-rise housing for immigrants. "At the very least," the king

told us in a long chat in his residential palace on the outskirts of Amman, "the great powers must freeze Israeli action to prevent this terrible injustice from going any further. The Vatican is well aware of what Israel is doing, but the other Christian religions do not seem to understand the extent of these grave injustices."

For himself, the king confirmed reports that Jordan will take the Jerusalem issue to the Secnrily Council later this year. The legal facts, he claimed, are incontrovertible. As n signatory of the Hague convention on the rights of an occupying power. Israel pledged to preserve exist-ing population patterns, the legal and administrative machinery in the occupied territory and its general character.

It is Israel's claim that Jordanian East Jerusalem now belongs to the state of Israel, a claim that has been repudiated by repeated UN resolutions. Israel, pledging to protect the access of all religions to holy places in East Jerusalem, has ignored these resolutions.

On other matters, the king told

 His army has ended all organized commando activity by ei-Fatali and other fedayeen groups. Instead of attacking the "common enemy," Israel, the fedayeen got "out of control completely" and tried to organize a semi-independent stato inside

• Recognition by some Arab states, possibly led by Algeria, of a provisional government of Paicstine, that is, territory lying on the west side of the Jordan River which Israel seized in 1967, is a distinct possibility. Such an act, he said, would complicate eventual settlement of the West Bank, which the king insists must be returned to

• The United States is not applying chough "persuasion"the king avoided the word "pressurc"-on Israel to compol it to ilquidate the effects of the 1967

The sudden spate of attempted coups d'étai in the Arab world is having "a disastrous" ef-feet on the rest of the world and on that most cphemeral of all Arab objectives-unity within the Arab world. He blamed Arab army officers for breaking their oaths not to interfere in political matters.

. A U.S. decision to give more F-4 Phantom aircraft to Israel would be a "defeat" for all Arabs, "Israel is already adamant," the king said, piece of new equipment makes them more so." The Basic Debate

A Fundamental Law' Of Catholicism

By James M. Johnson

weeks, a new crisis has arisen within the Roman Catholic Church. It is as significant in respect to the development of Catholicism as any of the many disputes now raging within that tormented body.

The new crisis concerns the Fundamental Law of the Church," which was initially intended as a statement of general principles prefacing a revised version of the church's Code of Canon Law. But it is now being promoted as a form of ecclesiastical constitution. At the end of the Second Va-

tican Council in 1965, it was suggested that the conciliar reforms entailed a revision of the canon law. A special commission was formed to undertake the revision under the chairmanship of Pericle Cardinal Felici, who had been general secretary of the council.

The commission has now unveiled its draft of the "Fundamental Law." The draft has been sent to bishops throughout the world and to some theologisus. But it has not been made public.

Proposals Attacked

The reaction was almost immediate. A group of theologians attacked the draft as a retrogression from the spirit of the Second Vatican Council and called upon the world's bishops to reject it. The bishops have until Sept. 1 to make their views known to the commission in Rome.

Last week, the French news-paper Le Monde published an article on the "Fundamental Law" by Jean Cardinal Danielou of Paris, a conservative, and an interview given by Leo Jozef Cardinal Suenens, archbishop of Malines-Brussels, a liberal, to the National Catholic News Service of the United States.

In the interview, Cardinal Suenens said that the Lex Funda-mentalis, as the document is styled in Latin, "disavows the spirit and also the letter of Vatican II. It is very evident that the Lex is a clear regression in regard to the orientation of Vatican II. The inclusion of 103 quotations from Vatican II documents—complete quotations or sometimes, curiously, incomplete ones-will not eliminate this conclusion after at-

tentive study."

The cardinal said that the draft "stressed to the maximum the absolute monarchical character of pontifical authority and minimizes to the utmost the collegiality of the bishops and the coresponssibility of Christians at every lcvel,"

The cardinal attacked the secrecy in which the document was drafted and distributed only to bishops and selected theolo-

Bitter Irony'

"The text is not accessible to the Christian public," he said, "and yet it is of vital concern is a constitution they will have to live under. It would be bitter frony if, on the occasion of such importance for the church, we did not put into practice the principles we proclaim."

He then referred to a recent papal instruction on the church and the communications media which said: "Since the develop-ment of public opinion within the church is essential, individual Catholics have the right to all the information they need to play their active role in the life of the church."

Asked whether the "Fundamental Law" was opportune, the Belgian primate said: "I respond without hesitation:

certainly not. First, I do not believe that it ... responds to a need. The council, with lits fundamental statements and reforms] has given us the required doctrinal preface as a point of departure for any revision of the code and, even above the conciliar texts, there is in the church a fundamental law, valuable for all times, which is the Gospel.

"It is dangerous to turn the Gospel into legal texts. And one cannot stress enough that the church is not founded upon law but upon the word of God to which the magisterium (the teaching office of the church] is subject.

"In addition, any charter published at this time risks blocking ali further development, whether theological, canonical or pastors!, even if it is declared that the character of the text is, on several points, 'provisional.'

In his articic, Cardinal Danielou defends the idea of a "Funda-mental Law" for the church, even if he does not directly endorse the text devised by the commis-sion in Rome. Whereas Cardinal Suenens says that be does not believe that such a law is needed. Cardinal Danielou argues that it essential.
"The law, in effect, is a con-

stituent element of the Christian

PARIS.—Within the last few mystery," he writes. "The law is, first, an expression of the divine will. It acts out the objective purpose of God for man ... This is true of the natural law, the Mosaic law and the evangelical

Cardinal Danielou explains the basic law of the church as being derived in various ways and timesfrom one source. "Thus," he writes, "there is the natural law from one source. "Thus." and its manifestation in positive laws. Also, there is the Moseic law, where the fathers of the church have distinguished the Ten-Commandments and the multiple observances by which they are applied. Then there is the evangelical law, where the first commandments of love of God and neighbor are determined in prescriptions that regulate the life of the community."

Subsidiary laws, he argues, have been developed to cover the whole activity of the church—entry into and exclusion from the church, worship and the sacraments and the orders, such as laity, clerics,

The establishment of these laws." the cardinal writes "is derived from the power to govern the church that Christ confided to the apostles and their successors. Already, in the New Testament, we see St. Paul imposing rules concerning the holding of assemblies, the discipline of marriage, the choice of ministers and chastising those who broke the rules."

Cardinal Danielou links the laws of the courcb to the infallibility enjoyed by "those to whom has been confided the instruction and government" of the church. He declares that a law, thus divinely founded, is superior to all other forms and that, under it, man enjoys true freedom. Cardinal Danielou has written

an article, not a theological tract. He seems to extend infallibility to an extreme that no theologian, not even the most conservative, would accept. The fundamentality to the Catholic and, indeed, the Chris-

na ce

tian church, of the Mosaic and evangelical laws is not at issue. Cardinal Suenens in his interview stresses their fundamental nature. The existence and nature of the natural law, despite Cardinal Danielou's expressed certainty, is now a vexed question theologically.

Unlikely to Agree

However, Cardinal Danielou's 300% attribution of a nearly divine character to the laws of the church that are intended to imple-ment the fundamental Mosaic and evangelical laws is unlikely to find many supporters in either liberal or conservative camps, St. Paul did make laws, but not

all are still on the divine "Statute Book." For example, he legislated that bishops should be "men of one wife only." But no Catholic bishop today may legally (that the one wife allotted to him by the apostle to the Gentiles.

The laws of the church change. even those promulgated in the most formal manner—the ban against usury, or lending at in-terest, for example, or against bigamy or a further marriage after the death of a spouse. The Mosaie and evangelical laws do not change; only their interpretations vary.

However. Cardinal Danielou's arguments probably reflect fairly well the mentality that shaped the "Fundamental Law of the Church." It was this mentality. as well as the text, that Cardinal Suenens apparently had in mind when he urged the bishops to reject the draft of the "Fundamental Law."

$\mathbf{Letters}$

. Mao Ze Dong

It was with pleasure that I read Mr. Stanley Kornow's re-view of the English translation of the Guide Nagel for China, which is excellent indeed (IHT, July, 16). The sole flaw in that review is when he writes: "The sole flaw... is that it employs the French rather than familiar Wsdc-Glies transcriptions of Chinese. Hence Mao Tse-tung is Mao Ze Dong and Sinking ... is Xin Jiang." Mr. Karnow should have noticed that the transcriptions employed by the editorial. staff of the Guide actually follow the now quite familiar Pelink system. Use of the French and tem, adopted by the Ecole Fran caise d'Extreme-Orlent would have given Mao Tso tong in the first case, while Sinking is in fact one possible transcription under this system of what is written as Hein chiang in Wads Giles notation

protection and armed forces from

Bahrein, Qatar and the seven Trucial States. 'Credible Deterrent'

Iran already possesses what American milicials term a "credible daterrent" in the air and the sea in the Gulf area, particularly in relation to neighboring Iraq, which Tehran considers to be an unfriendly country and which is heavily armed by the Soviet

American and British sales of modern equipment to Iran since 1969 have raised its military strength to a relatively advanced stage from what was an obsolete armed establishment. But this effort is now being significantly accelerated. Iran's 155,000-man armed forces are to be expanded

simultaneously.

By 1975, when the present program of military deliveries and training is completed, Iran is expected to be a major Middle Eastern power and an element of stability in the volatile Gulf re-

gion, American officials say Under present plans, the Iranian Air Force is to be expanded to a total of 135 Phantoms by 1975, to serve alongside the F-3 and F-86 squadrons already in its

U.S. credits were also used to build and expand Iranian air and naval facilities on the Persian Gulf and to complete a plant south of Tehran where about 850 American-made M-47 medium tanks, long held by the Iranian Army, will be "retrofitted" through the installation of more powerful engines and guns.

Aid Unannounced The Nixon administration has not announced the extent of its financial cooperation in the Iranian defense program. The known request to Congress for militaryassistance programs to Iran for fiscal 1972 is for only \$950,000 for training and support of the 250man U.S. Military Advisory Mis-

The first purchases of Phantoms and F-5s last year were financed through \$100 million in credits under the foreign military-sales program, but these figures remain unpublished.

A \$120 million Export-Import Bank credit line granted late last year for military equipment was also not publicly announced.

The Export-Import Bank pro-vides one-half of the required finds directly and guarantees private bank loans for the other

The shah is said to believe that a high degree of military mobility is essential to control the Persian Gulf area. Therefore, his government has been buying the new Hovercraft and helicopters as well as hundreds of tanks suited to the mountain and desert terrain of Iran and adjoining

countries. A hase for the Hovercraft has been built on the island of Kharg off the Iranian coast in the northern section of the Persian

Helicopter Flect

Tranian ground troops and the Hovercrafts are to be supported by a fleet of more than 200 heli-

Most of the helicopters have been ordered from Italian companies producing the craft under American licenses. Sixteen Chinook medium transport helicopters were delivered earlier this year. Before the end of 1972, Iran will receive 55 light transport helicopters and 145 general-

use heliconters. To assure proper deployment of the new forces along the northern coast of the Persian Gulf, Iran is expanding, with Export-Import Bank assistance, the port of Bandar Abbas, where a new naval base and airfield already

have been added. Render Abbas controls the Strait of Hormuz, which connects the Persian Gulf with the Gulf

of Omen to the east.

A new airfield is being built at Jask on the northern coast of the Gulf of Oman. Another airfield was built at Bushire, nearly opposite Kharg. The naval base at Khurramshahr, at the northernmost point of the Persian Gulf, is being enlarged.

France, Algeria **Exchange Their** 'Economic Spies'

ALGIERS, July 25 (UPI),-Three Frenchmen convicted on espionage charges were freed by the Algerian government yesterday following a reciprocal agreement by France to free three

Algerian spies. -In a mova that aignaled a new detente in Franco-Algerian rela-tions, Dr. Augustin Dalmais, convicted of apying on the Algerian government last November and sentenced to 20 years' imprisonment, was flown to Paris along with Georges Vedel and Eugene Gidon, telecommunications engineers sentenced to five years in jail for cooperating with Dr.

Acting reciprocally, French authorities released three Al-gerian citizens convicted of "economic esplonage" by the State Security Court in Paris. Dr. Dalmais was accused of heading a French operation to

intercept official Algerian communications. notably from the Ministries of Foreign Affairs and of Industry and Energy.

NEW LAMB SHEAR Prof. Phil Loggins uses his hands to shear a sheep treated with a new pill at the University of Florida in Gainesville recently. The drug, cyclophosphanide, temporarily stops the cell growth in the bulb of each wool fiber, thus causing it to break very easily at the skin line. What a fleecer!

Belgrade Law Meeting Ends; Hijacking 'Trial' Canceled

The Fifth International World Peace Through Law Conference should have seen an airplane hijacking demonstration trial, but the idea was abandoned yesterday because .10 Soviet jurist showed up.

Friday's session of the July 21-25 conference was highlighted by a mock trial at which it was assumed a U.S. space satellite had crashed into the Yugoslav parliament building in Belgrade. The satellite, with a Japanesemade retro rocket and parts built and assembled by an Italian firm, supposedly killed a foreign diplomat, injured another foreign husinessman and caused extensive damage to the building.

Burger Presides

U.S. Chief, Justice Warren E. Burger, presiding over an international six-judge panel, ruled that the United States should be held responsible for the crash

Liberians Meet Plane Carrying **Tubman Coffin**

MONROVIA, July 25 (Reuters). -Crowds of mourning Liberians briefly hurst through a police cordon in a demonstration of grief when a British Royal Air Force VC-10 landed here today with the body of President Wil-

liam Tubman The president, who ruled this West African state for 28 years, died at 75, in a London hospital Priday.

Men and women wept and called out President Tuhman's affectionate nicknames of "Bohber Shad" and "Vat" while the coffin containing his body was being taken from the plane. They aurged forward past police barriers and surrounded the aircraft as the coffin was laid on a guard stand for a salute.

Among those at Roberts Field when the VC-10 landed this afternoon was Liberia's new president, William Tolbert, President Moktar Ould Daddah of Mauritania and Gambian President Sir Dawda Kairaba Jawara. Tonight hundreds of people kept vigil ontside the executive mansion in Monrovia, where President Tubman's body was lying in state.

Nixon Tribute

WASHINGTON, July 25 (Reuters).—President Nixon paid trib-ute to President Tubman and extended America's sympathy to the people of Liberla, in a atatement Friday night.

Expressing sadness at the news of his death, the President said that Mr. Tubman had been wellknown and highly respected in the United States. He added that the world would "sorely miss his wise counsel and effective leader-

BELGRADE, July 25 (UPI) -- but declined to discuss possible

The conference organizers originally had planoed the satellite to have fallen on the Bolshoi Theater in Moscow, but since L.N. Smirnov, president of the Russian supreme court, and Chief Justice A.F. Gorkin of the Soviet Union, who were invited. did not come, the hypothetical site of the satellite crash was changed to the Belgrade parliament building.

"We had in mind to stage another demonstration trial," Bernard Segal, the recently retired president of the American Bar Association, said. "As the Russlans have not come, at least they did not register officially, we had to change the site of the crash for the satellite trial. Now we also have decided to abandon the idea of a demonstration trial on hijacking," Mr. Segal said.

Jodges

Meanwhile, Terje Wold, Nor-wegian retired chief justice, yesterday was re-elected president of the World Association of Judges at the final session of the third world assembly of the WAJ. The judges assembly was held concurrently with the Peace

Through Law Conference. Legal committees at the conference yesterday worked out resolutions on such topics as individual rights, legal aid and how to establish a workable interna-

tional criminal court. The conference closed yesterday with adoption of 30 resolutions In a plenary session of the 3,000 lawyers and judges from 114

Ganges Floods Rout Thousands, Damage Crops

NEW DELHI, July 25 Reuters!.—Scores of rivers and streams of the Ganges complex remained at flood level in northeast India today, leaving thousands homeless and mundating thousands of acres of crops,

Among the badly-hit areas were some border districts of West Bengal which now house millions of refugees from East Pakistan. But there were no reports of any of the refugee camps being directly hlt.

Away from the borders, troops with boats have been called in to help evacuate people from flooded areas in Hoogly and Howrah districts. Officials said that more than half a million people were affected in the districts and rice crops worth £1.1

million had been damaged. They said that floodwaters were still swelling today in the border district of Murshidabad, where about 100 aquare miles of territory had been flooded.

The Case of Albert the Alligator, A Golfer and a Pedigreed Poodle

MARCO ISLAND, Fla., July 25 (AP).-Albert the alligator has been ordered evicted from his golf course lake for allegedly eating a pedigreed poodle.

But the state has filed a countersuit in Albert's behalf, charging that he's the victim of a prejudiced judge and a gator-baiting golfer.

Albert ran afoul of the law in June when he slithered out of a take on the Marco Island Golf and Country Club course and reportedly gulped down Se St. the pet poodle of

Mr. Bailey flied suit asking that Albert be declared a hazard and be removed or eliminated. On July 12, Judge Harold Smith ordered the 10-foot Albert ousted because the judge said there was a danger he might graduate from dogs to "little children whn might wander near the lake shore." But the Florida Oame and Fresh Water Fish Commission delayed the eviction by filing an appeal charging Mr. Bailey with damaging state property—to wit, one alligator named Albert. The atate said Mr. Bailey "has attempted and continues to attempt to entice an alligator" from the lake for the purpose of clobbering said alligator "with golf clubs and

other instruments." Florida has stringent laws protecting alligators.

Soviet Navy Cites World Capability

Admiral Warns U.S. **Against Adventures**

MOSCOW, July 25 (AP) .- The commander in chief of the Sov-jet Navy chided the United States today for trying to frighten the world about a growing Soviet "naval threat." Then he warned "imperialists" that his fleets could attack any point on the globe with nuclear missiles. Adm. Serget Gorshkov used the occasion of Soviet Navy Day to proclaim that "never before has our navy been so powerful and

"The navy's regular maneuvers and exercises," Adm. Gorshkov said in an article in Pravda, "are proof of the Soviet Union": ever-growing strength as a naval

This is not to the taste of the inspirers of aggressiou ... who are trying to frighten the world public with the threat of Sovlet fleeta on the world's

The U.S. Sixth Fleet in the Mediterranean faces the possibil-ity this year of being outnumbered and outgunned by an expanded Russian Black Sea fleet. Up to 60 Soviet warships now

regularly patrol the Mediterranean, compared to about 40 U.S. 'vessels, Defense Minister Andrei A. Grechko and Adm. Gorshkov passed through the Dardanelles aboard the cruiser Dzerzhinsky last month in a show of Soviet confidence in the fleet. The two commanders had been

observing vast military maneuvers in the Black Sea and, for many observers, their trip seemed to signal an end to the American mouopoly in the Mediterranean. During the last eight years, the Soviet Union has transformed a small border fleet into the world'a

second largest naval force. Today, the Russian Pacific. Baltic, Black Sea and Polar fleets boast about 25 cruisers, 100 de-stroyers, about 1,600 smaller craft and an estimated 407 submarines,

2 Copter Carriers The Soviet Navy has no aircraft carriers but operates two new helicopter carriers, each with 30 planes designed to hunt and destroy submarines.

Adm. Gorshkov said that the

United States has developed "submarine missile systems" with which it "hopes to divert from the U.S. territory a considerable number of possible retaliatory nuclear strikes." "Vain hopes," he declared. "No

strategy, including this so-called 'ocean strategy' will save any aggressors who risk waging war on the U.S.R. and other countries of the socialist community from a crushing retribution."
Adm. Gorshkov's assistant, Adm.

Vladimir Kasatonov, hacked up his chief's warning today by proclaiming in the Defense Ministry newspaper Krasnaya Zvezda (Red. Star) that nuclear submarines are now the "main striking force" of the Soviet Navy.

The latest available figures revealed by the U.S. Defense Department indicate that the Russians have 87 nuclear subs and have achieved a parity with

the United States.
Since 1968, the Soviet Union has been adding a nuclear submarine to its arsenal about every month or so.

The Russians still lag behind in the number of submarines capable of firing nuclear missiles-17 to 41. But U.S. naval experts feel that this gap will be closed by Adm. Kasatonov said that the

"quality and quantity" of Soviet nuclear submarines "completely meet the requirement for successfully protecting our stata interests. Marshal Grechko, however, indicated that the Kremlin did

not intend to call a halt to the navy's growth. The international situation: the defense minister said, demands that the Soviet Union "consolidate its economic and defensive might and raise the combat readiness of

French Actor Seized in Rome

the army and navy."

ROME, July 25 (AP),-French actor Pierre Clementi was arrested today and charged with possessing drugs after police raided the Rome apartment of a frieod.

Police said that they found drugs-the kind was not specified -during the raid at the apartment of Anna Maria Lauricella. who also was arrested.

Mr. Clementi, who has starred in numerous films including "Belle du Jour" and "The Conformist," told police that he was a guest of Miss Lauricella and should not be held responsible for any drugs found in the apartment. He was arrested, however, although no drugs were found on him, police sald.

Fire on Taxing 747
CHICAGO, July 25 (Reuters). -Fire in an eugine of a taxiing United Air Lines Boeing-747 jumbo jet Friday forced the 195 passengers and crew to evacuate. Two passengers were admitted to a hospital and several others suffered minor injuries as they came

down the emergency chutes.

Top Spanish Designers To Revamp Program

By Hebe Dorsey

MADRID, July 25 (IRT).--High-fashion Spanish designers, trimmed down to nine names, showed their collections this weekend in the Eu-robuilding's exhibition hall.

The strongest story to come out of Spain this time is that their alta costura is even worse off than Italian alta moda. At this point, it is quite clear that Spanish designers have failed in attracting inter-national buyers and the shows were held for a scattered. mini-audience.

That is why, despite a few valid names such as Pertegaz, Elio Berhanyer and Mitsou (for leather), the Spaniards are thinking about revamping thair whole program. Instead of holding separate couture shows, they will lump them together with the rest of their clothing industry—shoes, fabrics, man'a wear, ready-to-wear, children's wear (a great Spanish asset)—in one big feria to be held in April and

As the Countess of Quinta-nilla, who has been steadily in charge of Spanish conture. said: "The only way to make it interesting for people to come to Spain is to present a complete picture of what we have to offer."

Losing Bnyers

"The alta costura has been losing buyers every year and to pull people to Madrid twice a year. So we are going for another formula that may have better chances to succeed. We may not be ready in October hut we hope to get organized by next April." The nine houses who show-

Rome Woman Found to Have

ROME, July 25 (UPI).- Doctors announced today that they removed 15 perfectly formed fetuses from the womb of a Rome housewife. They sald that it was

15 Fetuses

unprecedented, The woman was in the fourth month of pregnancy after under-going fertility hormone treat-

Dr. Gennaro Montanino said that the babies, ten girls and five boys, were perfectly formed and welghed about five ounces each, He said that he removed the babies Thursday after the woman was rushed to a hospital. All 15

were dead, he said, Similar Treatment

The woman; Dr. Montanino said, had an eight-year-old daughter born after similar hornione treatment. He said that the woman and her husband asked for another fertility treatment because they wanted an-

other child. The doctor sald that he realized three months ago the woman would have more than one baoy but was surprised at the number found:

"I thought at most there would be eight," he sald.

Two days ago, Dr. Montanino said, the woman began showing aymptoms of giving birth. She was rushed to the hospital and doctors decided to operate immediately.

"Apparently," he aaid, "when a pregnancy is caused by fertility hormones, the gestation period is reduced in proportion to the number of fetuses the woman is

carrying. An Australian woman gave birth last month to nine children. All of the children died within a

few days. Sources at the hospital identified the woman only as the wife of a wealthy businessman and said that she was in serious

Chile, Argentina End a Friendly **Summit Meeting**

SALTA. Argentina, July 25 (WP).—The presidents of Chile and Argentina yesterday ended their Andean summit meeting, which was held in an unexpected atmosphere of comaraderie.

Leftist President Salvador Allende of Chile and Gen. Alejandro A. Lanusse, the stern commander of the army that rules Argentina, sealed their talks with a declaration calling for joint efforts to expand trade, tourism and ex-changes of technology between

their often antagonistic countries. Geu. Lanusse asked to be excused from the final ceremontes of the two-day conference because of a kidney allment, but at the signing of the declaration he praised his counterpart, and Mr. Allende responded in kind at a

press conference.

Heart, Lungs Transplanted By Barnard His First Combined And World's Fourth

CAFE TOWN, Joly 25 (AP) Dr. Christian Barnard today performed his first—and tha world's fourth—combined heart and lung transplant operation. The patient, Adrian Herbert, 49, a Cape Town dental

technician, was reported pro-gressing well.

The donor was reported to be an African, Jeckson Gunya, about 28. who died in Cape Town's Groote Schuur Hospital last night from head injuries after being

involved in a fight.

Mr. Herbert is a colored, tha official term for those of mixed Dr. Barnard and his medical team had been put on alert for a week before the operation in

Groote Schuur. Incurable' Lung Ailment

A brief hospital bulletin said: "A heart and both lungs wera transplanted on a patient suffering from an incurable lung con dition which had also affected the heart. The operation was completed without complications and at the moment the heart and lungs are functioning nor-mally. At present it is too early to make any prediction about the immediate and long-term results."

Dr. Barnard told newsmen "The more organa you transplant the more you have to watch out for so far as the immunological aspect is concerned. We haven't had any experience with this type of operation clinically and we'll just have to watch that results very closely. So far the patient is as well as can be expected."

Doctora say that the first 14 days after a heart-lung operation are the most critical. The greatest danger, apart from rejection, is an excess of fluid in

The three previous heart-lung transplants, all unsuccessful, took place in the United States.

Apollo-15: The Most Ambitious Manned Moon Shot to Date

By Walter Sullivan

NEW YORK (NYT).—As though to make up for the moon landings that have been canceled. planners of the Apollo-15 mission, set for blastoff today. Monday, have crammed an extraordinary amount of exploration and scientific observation into its program.

The objectives, in this respect. are far mora ambitious than on the three previous landings. One reason for this is that the lunar rover being carried by Apollo-15 and more portable oxygen should enabla tha astronauts to cover much more territory than has been possible before.

Another reason is the great diversity of features in the designated landing area. They include mountains, peculiar clusters of craters and a dramatie example of what is perhaps the most puzzling type of lunar feature.

This is a "sinour rille"-a meandering, eanyonlike feature strikingly like the gorges carved by flowing water on earth. Some have thought that the rilles were formed by water in some earlier period, perhaps when the moon had an atmosphere and some liquid water.

However, the analysis of rocks hrought back on the previous missions has shown that the rocks had never been exposed to liquid water since they were last molten. Hence, other explanations for the rilles have been forthcoming that they were formed by lava or the flow of electrified dust, whose behavior in the deep lunar vacuum would be difficult to predict from earth-based ex-

The lunar module, or LM, is scheduled to land less than a mile from tha rim of Hadley Rille, one of the most dramatic such features on the moon. A visit to that rim is the first

Probe Honed, Key Element In Docking

By Thomas O'Toole

COCOA BEACH, Fla. (WP).-The cone-shaped metal probe that the Apollo-15 astronauts will use to dock their command craft Endeavour with their landing craft Falcon is one of the most fussed-over pieces of equipment ever sent to the moon. "We've spent the last five

months working to make sure this probe works just right," said the Apollo spacecraft manager. Brig. Gen. James McDivitt. "We've tried to cover every possible malfunction that probe could have when it's used in the docking procedure."

The reason for all the fuss is the trouble that the Apollo-14 erew had docking their command craft and landing craft last Jan. 31. It took the Apollo-14 astroneuts six attempts and more than two hours to get the docking probe to join the command craft and landing craft together.

14 probe was returned to earth study, the space agency is still not sure what made it go Wrong.

Even though the faulty Apollo-

One theory is that a metallic sliver of some kind was caught inside it, lamming one of the probe's moving parts. A second theory is that one of the probe's more delicate parts was defective, preventing the probe from moving into the landing craft's drogue mechanism the first five times it was tried.

Working on the assumption that one of these two theories is the right one, space engineers have done everything they can to the Apollo-15 probe to prevent any repeat of the Apollo-14 inci-

"We've kept it as clean as we could every time we handled the probe." Gen. McDivitt said. "We've also put a cover on it whenever moving it or shipping it to make sure no dirt or slivers get into the mechanism."

He said the more delicate and clock-like parts of the probe have also been re-machined, to make them move just a little smoother than before.

The sharp corners on the probe's cams were rounded out. a pin that stides along a Z-shaped cut when the probe is driven torward was rebuilt and a stateless steel ball that rolls when the probe's motor gees on was made just a little smaller to prevent it from jamming.

"We still don't know what caused the problem on Apollo-14" Gen. McDivitt said, "but we've done everything we can to prevent it from bappening segin. He said one of the smartest decisions he ever made was to have the Apollo-14 astronauts return to earth with the probe.

"Before we got that probe back we had a million theories about what might have gone wrong, from loc much heat on the probe to see in the probe to oil in the probe," he said "By examining that probe. I was able to eliminate 99 percent of these theories and the process of elimluation is still one of the best ways of analyzing any problem we come up against."

Scott, the spacecraft's commander, and the LM pilot. Lt. Col. James B. Irwin, once they have unloaded their electric-powered

The rille is about a mile wide and I,200 feet deep. By contrast, in its most spectacular sector the Grand Canyon is 4 to 18 miles wide and a mile deep.

One concern has been whether or not the rim of the rille will collapse under the weight of the rover. This is considered unlikely

from careful study of photographs made from lunar orbit. The rim appears rounded and stable. Howerer, the astronauts will have an alpine rope for use if they sec

The olher great feature to be explored is the Apennine Mountain front, whose foothills lie two miles south of the landing site. This mountain wall rises 12,000 feet above the relatively flat Putrid Swamp, or Palus Putredinis, where the landing is to he

Italian mountain range, arc a curved wall of rock that seems to form part of the rim of a gigantic crater known as the Sea of Showers, or Mare Imbrium. The sea is the largest such circular feature on the moon. It presumably was formed by the explosion of some object that hit

As with other such large circular features on the moon, the Sea of Showers contains, near eenter, a concentration of

The Apennines, named for en dense material, or "mascon," that exerts a slightly elevated gravitational pull on spacecraft passing over in orbital flight. Some suspect that this is the buried remnant of the impacting object. If the astronauts can bring

back rock samples that indicate the time when this impact occurred-a subject now of con siderable controversy—this will help establish a timetable of other lunar events. It will also indicate how recently the part of the solar system occupied by

the earth and moon was clut-tered with large objects that bombarded them both.

If all goes well, an entire complex of instruments will provide a third station on the moon capable of recording the caused by internal "moonquakes" and by impacting objects such as a discarded LM or a meteorite.

Since the central stations at the Apollo-12 and Apollo-14 sites are powered by atomic batteriesas is planned for Apollo-15-both

are sending suc data to earth. The schillion of a third station will enable scientists to plappoint, in three dimensions, the location of each source.

This will show not only the location on a map of the moon, but the depth, if the quake originates below the aurisca. Some believe there is at least one area deep inside the moon that generates moonquakes each month, when the moon makes its closest approach to earth, presumably because the earth's

HOUSTON, July 25 (AP).—Col. David Randolph Scott, the commander of the Apollo-15 moon mission, once trained six months to become America's second space walker. He was to spend almost two hours floating in space, attached to the Gemin!-8 spacecraft by a tether and an oxygen hose, but a malfunction ended that 1966 mission a few hours after it began and Col. Scott never walked in space.

But, on his third flight into space. Col. Scott will make a hazardous landing in a meon mountain valley surrounded by rugged peaks and a deep, milewide gorge. He and Apollo-15 crewmate Col. James B. Irwin will spend almost 21 hours exploring there, driving the first moon car over the crater-pocked lunar surface. The 39-year-old Air Force colonel is the son of a retired Air Force general, a World War II pilot who started him toward aviation at an early age. The astronaut was born in San Antonio, Texas, where his father was assigned to Randolph Air Force Base, the "West Point of the Air." Col. Scott was the first son born to an officer assigned to Randolph, a distinction which explains his middle name.

First Flight

He attended elementary and prep school military academies in San Antonio and remembers having even then an excitement for The spaceman's parents, relir-

ed Brig. Gen. and Mrs. Tom W. Scott, now live in Lo Jolis. Calit. Col. Scott attended the University of Michigan for a year and, in 1960, received an appointment to the U.S. Military Academy at West Point. Four years later he graduated fifth in a class of 633 and took his commission in the

After earning his wangs at Randolph, Col. Scott served on a tactical fighter squadron in Holland for more than four years. He west back to school in 1960 in an Air Force-sponsored pro-gram at the Massachusetts Institute of Technology. He wrote a thesis on interplanetary navigation and was graduated 1:1 1962 with engineering and master of science degrees in aeronautics and astronautics.

He was attending the Air Force Aerospace Research Pilot School at Edwards Air Force Base when the space agency picked him for the astronaut corps.

Strength

Col. Scott was selected for his strength and flying ability to be pilot and space walker on the Gemini-8 mission. He and astronaut Neil A. Armstrong, leter to become the first man cu the moon, were smoothly launched and had flawlessly linked the:r Gemini craft with an unmanned rocket when the combined vehicles suddenly began to spin out of control. With the spin getting faster and faster, they decided to undock. As they did so, the spin grew even more rapid. When it reached almost 60 revolutions per minute, the spacemen fired a re-entry rocket package.

This controlled the spin, but it

also forced an end to their mission. Later they learned that a rocket thruster with a short circuit had caused the spin.

Cal Scott's second space flight was on Apolio-9, an earthorbit mission and the first nunned space test flight of the Apollo lunar module, Col. Scott's work as command module pilot on that 1969 flight earned him an appointment as commander of Apollo-15. The astronaut is married to the former Ann Lurton Ott, the daughter of retired Air Force Brig. Gen. and Mrs. Isaae W. Ott of San Antonio.

Mrs. Scott says that as a 3year-old she met her future husband when she crashed his 10th birthday party. Both families then lived in San Antonio. The Scotts have two children,

Tracy, 10, and Douglas. 7. They live in a sprawling, comfortable ranch-style house, built among the frees, curving streets and green lawns of Nassau Bay, a community near the Manned Spacecraft Center. A common sight in that com-

munity any morning is Col. Scott jogging along the curb just after daylight. The astronaut runs two miles a day and has e reputation as one of the strongest of the astronauts. Technicians who fit the estronauts with spacesuits say they have trouole with Col. Scott because his arms, chest and neck are more heavily muscled than most men.

The flight of Gemini-8 wasn't first brush with death for Col. Scott. He walked away from two major airplane accidents. During a je' flight in Holland. he discovered his throttle was frozen open. He cruised to burn up fuel and then tried to land with the engine still giving full nower. He opened his braking chutes in hope of slowing down, but they tore away. He stomped his skid brakes, but both main landing gear tires blew out. A steel mesh barner finally stopped the hurtling jet and Col. Scott was unhunt.

Later. 21 Edwards Air Force Base, he and a copilot landed too hard in a jet. A fraction of a second before the plane broke apart. Cel. Scott ejected to

James B. Irwin Jr.

HOUSTON, July 25 (AP),-James B. Irwin jr. decided ten years ago he wasn't going to let an airplane crash keep him from going to the moon.

The 41-year-old Air Force lieutenant colonel is the lunar module pllot on the Apollo-15 mission scheduled for launch from Cape Kennedy tomorrow. He started working to become an astronaut almost as soon as be learned the country was getting into the manned space business. "It just seemed like that's where the future tried to get as much experience and education in space-related activity as I could."

Col. Irwin earned important credentials when he added a master's degree from the University of Michigan to his bachelor of science degree from the Naval Academy and then graduated from the Air Force Experimental Test Pilot School.

He was ready to apply for the space program in 1961 when a weekend training flight ended in near disaster. Col. Irwin was flying as instructor with a student pilot at Edwards Air Force Base. Calif. They were cruising at 300

15 will cost the United States \$445 million, which not

only makes this mission the most

expensive so far but tops the

record cost of Apollo-14 by \$45

One reason for the record cost

of Apollo-15 is its record length

of 12 deys, three on the surface

of the moon and six days in-

cluding the three on the surface?

in lunar orbit. This adds \$10 mil-

lion alone to operational costs.

Another reason is the four-

wheeled electric car ralled the

ried on an Apollo moon lunding

for the first time and which adds

\$4 million to mission expenses.

Another \$1 million is tacked on

Maj. Worden is one of six children. His father, Merrill B. Worden, is e projectionist at a movie theater. During a large part of the astronaut's childhood, his family lived on a farm near his birthplace of Jackson, Mich.

Maj. Worden spent the seventh and eightb grades attending a little one-room country school-His last years in public school were at East Jackson High, and Maj. Worden saya that after classes he usually would go to the theater where his father worked and "watch the latest horror movic." I think I saw King Kong five times, he says. "I

still enjoy that movie." With three brothers and two sisters in the family. Maj. Worden said he realized early that if he went to college it would be on his own. He earned 2 scholarship to the University of Michigan and was set to go when a friend talked him into taking the exams for the military academy, and he gained a West Peint oppointment for the next year Maj Worden attended the University of Affelligan for one year. In his senior year at West Point, he chose a commission in the Air Porce. "I never really he says. It was only like five minutes before I had to decide that I really finally made up

Lunar Roving Vehicle Is the Key New Item in the Improved Payload

By Richard Witkin

COCOA BEACH, Fig. 1NYT1.~ The five main Saturn-V rockets, each 13 stories high, will be set to burn four-tenths of a second longer than on past moon

Four of the eight "retro" or

backward-firing rockets used to separate the spent first Saturn dage from the second stage have been eliminated. The spidery lunar module that

will make the hmar landing will have higher-capacity propellant tanks that are five Inches longer than before. There will be no back-up

lelevision camera, an Il-pound

item, despite the wishes of some

officials who remember the drop

in public interest when the sun's

rays damaged the camera on Apollo-12 and canceled moon-to-

These are a few of the change. that have been instituted on the Apollo-15 flight so that 5,000 cxtra pounds of payload can be deliverd to the moon. The total weight of the commend and service modules, which will remain in lunar orbit, and the kmar module. which will land on the moon, will be 103,100 pounds, compared with the 97,920 of Apollo-14.

From the viewpoint of what is likely to be accomplished on the Apolio-15 mission, which begins here this morning, the most important item in the added weight will be the 460-pound lunar roving vehicle.

This vehicle will enable the astronauis 10 explore a 113-

:quare-mile area-ten rames whot they could explore on foot,

2,470 Pounds

In all-with the rover, its associated gear and ennsumables loxygen, water and fueli- the lunar module witt waigh 2,470 pounds more than it did last time cut. The command and service modules will weigh an additional 2,640 pounds, 965 pounds of it representing new scientific exper-

ments, and the rest the structure, power and controls lo make them work. The space agency weightwafchers have performed some fancy tricks to make possible the delivery of the extra 5.000 pounds to lunar orbit, and the depositing

of the rover and other new gear

On the Salurn-V launching vehicle, there will be tiny extensions of burning time and the discarding of the four retro rockets, In addition, an extra 22,000 pounds of thrust has been obtained by alight alterations in the holes through which fuel and oxidizer flow. This subtle change alone makes possible the carrying of 650 extra pounds.

Actually, only 1,370 pounds of the total 5,110 in extra payload ore accounted for by Saturn-V hardware changes. The rest is occounted for by half a dozen changes in bow the Saturn booster rocket is operated.

For instance, the Apollo-15 spaceship will be hurled initielly into an earth orbit only 90 nautical miles high instead of 100. The initial aim will be 80 degrees instead of 72 degrees, a switch

that takes belter advantage of the propelling motion provided by the eerth's west-to-east rotation. Finally, because of the con-fidence created in the Saturn-V by its unbroken string of successes, some precious pounds are being saved in fuel reserves.

Extra Braking

It is one thine for the Saturn-V to dispatch the spaceship to junar orbit. But then the lunar module's rocket engine has to take on the hurden of ferrying a heavier load than before from lunar orbit and providing the extra braking power for a gentle touchdown no the moon itself. To get more thrust out of this engine, the exhaust nozzle has been extended about ten inches. Because the lending will be made

in the roughest region any apollo mission has attempted to date. the pian calls for giving the astronauts IT seconds of extra hover time so that ther can maneuver between any boulders or craters in the final momerits before touchdown.

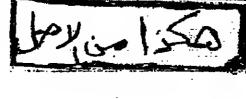

Because the lunar medule will

have to withstand extremes of

temperature for a longer period than its predocessors: tor hours instead of 35, extra insulation has been added." In their scrimping and pariot

in compensate for weight increase, the Grunnian Aero-space Corp enginers found a way to eliminate two so-raised "bulance" line installed to make sure of even depletion of tuel from two tanks and exidiser from two others. The saving was 7 1 7

Hesitant Recovery and Continued Inflation Confirmed by Reports for Second Quarter

By Thomas E. Mullaney

NEW YORK, July 25 INYT).

There was little reason for any great exhilaration—or disappoint ment Either-in the financial and economic worlds after analysts had scrutinized the second-quarter reports on industrial production, personal income, housing and the gross national product that were issued in the last two weeks.

In total, they contained few surprises and depicted an economy that is continuing a besitant recovery accompanied by highlevel inflation and stubborn unemployment.

It is apparent that the economy'a upward acceleration fol-lowing last year's recession did slow perceptibly in the last three months; that inflation remains a serious threat, and that the nation's foreign trade is in bad

The most bitter pill of all was last week's report that the consumer price index took another sharp climb last month-up 0.5 percent after a rise of 0.6 percent in May. It was hardly cheerful news.

With defense spending and business outlays virtually flet, the consumer sector alone has provided any basis for encouragement-and that performance, too. is subject to mixed interpretation.

The public's expenditures for housing, automobiles and a wide range of other goods have expanded substantially, but have not blossomed forth as fully as enlarged incomes might normally

This was evident from the fact that public savings reached a 20year high at 8.4 percent of dis-posable income. That is almost

plants are operating at only 73 two full percentage points above the historical rate and represents some \$15 billion that has been withheld from the spending

stream.

The 3.6 percent increase in real growth during the second quarter will have to be stepped up appreciably if there is to be any meaningful reduction in the econ-omy's idle resources of manpower and industrial capacity, Unemployment continues to run at a 6 percent rate and manufacturing

percent of capacity.

Outside the economic data, however, a new element has been introduced that might, in time, exert a profound influence on the

course of the nation's economy. That, of course, is the President's surprise disclosure that be has agreed to undertake a mission to Peking to seek a "normalization of relations."

Although the financial markets have yet to react dramatically to

Amex and Over-Counter

NEW YORK, July 25 (NYT).-Stocks on the American Stock Exchange drifted lower last week, with the index closing at 25.44, down .17 from a week ago. Voluma also was somewhat lower—14,-147,900 shares compared with 15,932,000.

The star performers in activity during the week were B group of Canadian oll stocks, perhaps influenced by recent problems and setbecks the oil industry has suffered in Venezuela and the Middle

Canadian Homestead Oils topped the most active list for the week with 445.600 shares changing hands. Despite all that activity, it added only 1 1/16 point to close at 10 1/8.

Imperial Oil ranked No. 2 on the most active list, with 241.100 shares changing hands. It closed at 27 1/3, up 1 1/2 for the week. A producer of frozen vegetables and fruits, United Foods, was the third most actively traded issue. It ended the week at 6 3 8,

up 3/4, on volume of 153,100 shares. In the over-the-counter market, industrial stocks drifted downward in moderate trading. The National Quotation Bureau index was 461.38, somewhat lower than the 462.28 reported a veek before.

Among the insurance stocks the trend was definitely a little lower. For example, Connecticut General lost 2 points during the week. American International Group was down about 3 points for the week. The St. Paul Companies showed a 2-point decline, and General Reinsurance was off 4 points,

Bank stocks were described as "a little easier." For example, Bank of America dropped 1 point during the week. Citizens & Southern showed a decline of 1 1,2. Valley National was off 1 point. thusiastic about it for various reasons. Some see the effort to thaw dealings with China as a benefit for the nation's international relations and trade prob-lems; others view it as a potential psychological lift for apathetic consumer sentiment.

The Treasury this week offered the first long-term bond issue it has sold in six years at a 7 percent interest rate under a congressional exemption that permits limited offerings above the statutory 4 1/4 percent ceiling.

The move, however, failed to excite the investment community because the government has each large financing needs in the six months shead. Some bond authorities feel those needs presage even bigher market rates later this year.

In this first financing effort of the second half of 1971, the government's debt managers decided to offer a new ten-year bond priced slightly below 100 percent of its face value to yield 7.11 percent. It is part of a two-issue offering made to holders of some \$5.1 billion of government bonds and notes maturing on Ang. 15.

As a concession to public investors under congressional prod-ding, the Treasury will permit individuals to invest up to \$10,000 in the new 7s of 1981 even if they do not own either of the two maturing issues.

The legislativa actions that aroused the interest of the business world were the House Banking Committee's endorsement by a narrow margin of a bill to extend financial sid to financially distressed corporations such as (Continued on Page 9, col. 1)

2d-Quarter Reports Confirm Recovery

(Continued from Page 7) Lockheed, and a House-Senate conference approval of a bill allowing Export-Import Bank financing of exports to Communist

Of 45 leading companies that issued their financial reports last week, 35 indicated improved profits for the second quarter as compared with last year. More-over, a survey by the First National City Bank of earnings determents from 560 nonfinancial compenies showed a solid 10 per-cent sam in net profit for the econd quarter over the same

The stock market virtually select time last week, ending

slightly lower in the alowest trading for a full week since mid-November. Its consolidating phase was thus stretched through its 13th consecutive week.

There was no particular economic or political news event that could inspire the market one way or the other. The movement of many stocks, therefore, was related strictly to second-quarter earnings reports.

A total of 943 issues declined for the week, while 697 advanced and 189 closed unchanged. All the leading averages show-ed slight declines. The Dow Jones

Industrial Index easad 0.73 to 387.78; The New York Times combined average slipped

decisions the cost of supplying the quotations and the fact that they publish their own weekly price

But the principal source of irritation appears to be that a few market makers were nawilling to deal in issues they listed in the pinksheets.

"We found that the pinksheets have been used for publicity purposes by traders who don't make a market in securities they put their name to," Armin J. Mattlé, manager of Bondtrade, said.

"Our view is that the pinksheets have been misused." Walter Koller, manager of White Weld's trading department, said. He did not mention any names of the alleged phantom market makers, but said that as many as three London houses could be so clas-

Edward J. Crockett, editor of the weekly, said he did not think it was his firm's responsibility to determine who makes a genuine market, "There seems to be some snohbery involved and I think some of the big houses don't really welcome competition from the small ones," he said.

The weekly list is patterned after the daily over-the-counter pinksheets published in New York by the National Quotation Bureau Inc., an affiliate of Commerce Mr. Crockett said that despite

the withdrawals, at least three other market makers would be listed in the pinksheets in the coming months. He added that quotations would be expanded to include Euroguilder issues, deutsche mark-sterling option issues and Unit of Account issues.

Values Changing for Pan-Am Games

By Neil Amdur NEW YORK, July 25 (NYT). On Feb. 25, 1951, a heavy thunderstorm forced postponement of the opening ceremonies in the first Pan-American Games

in Buenos Aires.

"The Olympic gods are showing their presence," a Latin cynic observed at the time, eager to compare the Pan-Am competition to its more famous international counterpart, the Olympic Games. The sixth Pan-American Games will begin in Cali. Colombia, on Friday, and cynics are preparing a new set of values: How relevant re the Pan-Am Games, can the United States continue its medal monopoly, what new political vibrations will be felt as a preview

for the 1972 Olympics in Munich? The first Pan-American sports congress was convened in 1949 as an extension of the Olympic movement to encourage nationalistic pride and qualitative performance among athletes of Western Hemisphere nations, mainly Latin American countries who found themselves shut out from recognition and achievement at the Olympic level.

The First Games

At the first Pan-Am Games, Argentina, the host nation, won 153 medals, compared to 97 for the United States, 42 for Chile, 40 for Mexico and 31 for Brazil. Americans refused to take the first meet seriously, particularly since it fell too early in the season for significant showings in track and field and swimming, the glamour events.

Over the last four Pan-Am Games, however, the U.S. Olympic Committee has extended a friendly hand, and the results are evident: Of 638 gold medals, American athletes have accounted for 435, or 66 percent.

By contrast, Argentina's medal total declined (78, 42, 42, 34). So did Chile, Venezuels and Brazil. Political instability has been cited as one reason for the inability of some Latin countries to organize and finance successful long-range amateur athletic programs.

The emergence of Fidel Castro, a sports enthusiast, and a powerful political force in Cuba, and the technical assistance Cuba has received from the Soviet Union seem to have influenced the dramatic turnaboot in Cuban athletics.

Formidable Challenge

Cuba won only ten medals in 1959. In 1963, shortly after Castro took control, the figure was 12. At the last Pan-Am Games in Winnipeg, Cuba won 48. This year, the Cubans will field a formidable challenge to the United States in at least three areas—track and field, baseball and weightlifting. For a while this spring, it was

feared that top U.S. athletes, most notably in track and field and swimming, would skip the Pan-Am Games. Track athletes saw better competition and money in Europe. ners were concerned about peaking too soon for the national

outdoor championships.

LAME EXCUSE—David Bedford of England grimaces in pain after straining hamstring muscle in 5,000 meters.

Injury Halts Britain's Bedford In 5,000-Meter Mark Assault

LONDON, July 25.—David Bedford, Britain's star long-distance unner who has broken two European records this year, retired from the track yesterday because of an injury when he seemed near to breaking Australia's Ron Clarke's world record for the

The 21-year-old Bedford had five laps to go at London's Crystal Palace Stadium. A doctor later said Bedford's injury was not serious and was more cramp than strain in the hamstring.

A bitterly disappointed Bedford, who holds the European record at 13:22.2 and the 10,000-meter record in 27:47.0, said: "I could have gone on but with the European championships coming up in Helsinki I decided it was not worth risking serious injury.

"I felt a slight twinge in my right thigh with six laps to go and after another 200 yards, I felt it tightening up again," Bed-

True to his forecast, Bedford had left the field behind running easily, and reached the kilometer mark in 2 minutes 34.7 seconds with a 50-meter lead, seven seconds ahead of Clarke's pace when he set the record five years ago at Stockholm. Clarke's final time was 13:18.8. Mike Baxter of Britain won the race yesterday in 13:39.6.

Henry Hines of the United States won the long jump at \$2 meters (26 feet 3 1/2 inches).

familiar names. But even a second tier of talent would appear strong and eager enough to preserve American pride in Cali, although some coaches are fearful about maintaining the U.S. margin of superiority next summer in Grueling Series

With a few exceptions, American track and field athletes decided that South America might be as interesting as Europe. It is a young U.S. track squad, which may not object to uncomfortable heat. It's also doubtful that the Americans will be at a peak, The U.S. Pan-Am swim team particularly after the grueling still is minus many of the more series of meets in the last month.

More likely, Marty Liquori, Steve Prefontaine and others will be running well enough to win. hopeful that their background and experience will allow them to "train down" from the summer pace, return healthy to the United States, lay off briefly and then begin the gradual, but important technical preparations for next

Ali Files Tax Suit Over Prepayment

HOUSTON, July 25 (AP) .-

Muhammad Ali asked a federal judge Friday to prevent the Internal Revenue Service from seizing part of tomorrow's gate receipts as tax prepayment. Ali is to receive \$450,000 or 45 percent of the live gate and television proceeds.

His petition, filed with District Judge John Singleton jr., said the IRS had threatened the action unless Ali agreed to pay the estimated tax due from the fight.

It said such an arrangement was 'discriminatory, arbitrary and capricious." Ali said he was willing to pay his quarterly estimated tax as it became due.

Ali Spars With Bugner

HOUSTON, July 25 (AP) .- Ali went two rounds with European heavyweight champion Joe Bug-ner of England Friday and after the sparring session called Bugner a better fighter than unbeaten George Foreman. All said Bugner is a "great white hope."

—A ring of about 500 police was three tries and winger Hannes viljoen had two. Ian McCallum thrown around the South African Rugby Union Springboks' motel last night after anti-apartheid protestors threatened to throw the Springboks out.

The tight police cordon followed a charge by state police, who drove 2,000 rock-throwing demonstrators into a park opposite the motel. The charge dispersed the demonstrators and only a handful of protesters showed up

Queensland police commissioner Ray Whitrod said he ordered the charge after a rock crashed through a window of his headquarters suite on the motel's third floor.

Barbed Wire Again

The Springboks defeated Queensland yesterday, 33-14, in the quietest match of the tour anti-apartheid leaders and trade unionists declared a boy-cott of the four matches in Queensland. There were no smokebombs or attempts to dis-rupt play for the first time during the tour. However, the South Africans still played inside a high barbed-wire barrier. A crowd of 9,000 saw the match.

During the match, however, anti-apartheid demonstrators met at Victoria Park and marched two miles to the Springboks' motel in a rally that culminated in last night's violence.

In another protest against the state of emergency, anti-apartheld students have occupied student union buildings at suburban St. Lucia University since Friday, In the match, Springboks'

Hayes Claims Saving Landry In Bomb Threat

DALLAS, July 25 (AP).—Bob Hayes, Dallas Cowboys wide receiver, saya he paid \$200 to keep an extortionist from kidnapping his daughter and bombing the homes of coach Tom Landry and the club president, Tex Schramm. These people told me they were going to bomb Tom's house

and if that didn't work they'd put a bomb in his car." Hayes told Steve Perkins of the Dallas Times Herald. Hayes said the telephone threat came last October.

"They said they were Cowboy football fans and were going to get even for Tom putting me on the bench," Hayes said. 'I told them that was ridiculous over a

contract, over a game." Hayes said he left \$200 at a prearranged place and "I never heard from them again."

Ex-Guard Suing Eagles PHILADELPHIA, July 25 1UPD.

Former guard Don Chuy of the Philadelphia Eagles and Los Angeles Rams attacked the injury clause in the NFL standard player contract in a \$1 million federal court suit.

Chuy has requested U.S. District Court to declare the clause violates the Sherman Anti-Trust Act because it allows a fcotball club to determine whether it should compensate a player for an injury.

The suit, seeking \$1 million in damages from the Eagles and the NFL, claims Chuy was forced to end a seven-year pro career in 1969 because the Eagles provided "inadequate medical treatment" for a shoulder injury suffered against the New York Giants Nov. 2, 1969. Chuy said the Eagles then refused to pay him the remaining \$60,000 of his three-year, \$90,000 contract.

BRIDGE.

By Alan Truscott

The diagramed deal from the life master pairs event of the American Contract Bridge League's summer nationals provoked considerable post-mortem discussion. The best contract for North-South is seven diamonds, but very few pairs reached it. They were mostly hampered by pre-emptive action from West. The hidding sequence by Roger

Stern and Henry Beths of New York, shown in the diagram, was not only the most protracted of all but also included a unique feature: 10 consecutive bids, from three diamonds to five clubs, were the minimum action available short of passing. Their style bears some resem-

blance to the slam bidding of the Italian experts who use the Blue team club, Most of the bids were cuebids showing controls, but South's three no-trump and fourdiamond bids were both natural. North's four no-trump bid was not Blackwood, which is inap-propriate in a cue-bidding auction, but a constructive move asking partner for further information

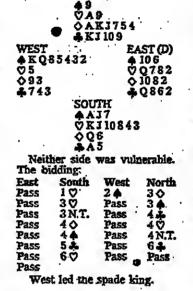

After this elaborate exchange of information, the players were close to reaching seven diamonds. Stern, who was South, said afterward that he would have bid the diamond grand slam if his partner had chosen to bid six diamonds, suggesting reasonable solidity, instead of six clubs.

After the lead of the spade king had been taken by the ace, Stern led a heart to the second trick, deliberately taking the finesse in the direction that figured to lose.

The finesse did lose, but it was

Whatever East returned, it was an easy matter to draw the missing trumps and discard the losers on dummy's dia-

Notice that the normal play of leading to the heart ace and then finessing against Best would have led to the same result. It would have given the declarer a slightly better chance of making an overtrick, but would also have

THE SUNSHINE SOLDIERS By Peter Tauber. Simon and Shuster. 262 pp. \$6.95

Reviewed by Richard Lingeman.

WARS come and go—or at least they used to-but armies remain the same. Anyone who has been subjected by his friends and neighbors-or even volunteered for it—to Army basic training will find much that rings familiar in Peter Tauber's "The Sunshine Soldiers," a sort of journal of his eight weeks of Basic Combat Training. They will also find much to laugh at through gritted teeth, because Mr. Tauber has a nice sense of the absurd, which the Army kept the absurd, which the Army kept busy nearly every minute of the day. The tone is self-mocking, irreverent and anti-heroic, for, aside from some gung-ho drill sergeants and warwhooping Southern boys, Mr. Tanber's outfit, Charlie Company, was a pret-ty unherole lot. But what basic training company isn't? From predawn to exhausted lights out, the trainee is subjected to an incessant din of semi-intelligible commands, a torrent of invective that is usually as unimaginative as it is obscene, and a welter of meaningless Sysiphean tasks, all designed to stamp out of him any remaining vestiges of civil-

One fine day, Mr. Tanber, as he then was, "perhaps stoned," took the oath of enlistment in the Army Reserve because, "like the hottest places in Dante's hell, it specializes in accommodating those who in times of moral crisis preserve their neutrality. They offer you a better shot at staying alivo than anyone else; for a pretty cheap price. He had weighed his options—options that confront uniquely today's generation of young men who are options that the confront uniquely today's generation of young men who are options that the confront uniquely today's generation of young men who are options. posed to the war—and found they all demanded too high a price: jail had a strong moral attraction but he had no desire to "let buggerers and car thieves beat up on you for being less decent than they"; Canada, conscienti-ous objection, deferment for some hastily adopted chronic ailment were all similarly rejected, So that left the reserve, a ticket to eight giorious weeks of summer camp af Fort Bilss, Texas, followed by four combat-free

months of active duty.

Mr. Tauber's group of 20 New
York reservists was thrust in with a variety of draftees and enlistees—Texans, cool and sure in their sense of white supremacy; Southern good old boys; Mexican-Americans, some of whom were the most hawkish of the lot; Southern blacks and assorted other American sub-species, New York Jewish meet Middle America. Despite its all-American character, like those ethnically balanced squads in World War II movies. Chariie Company was no melting-pot. The New Yorkers hated the Terens: the Terans hated everybody; the Southern boys hated the blacks and the blacks kept to themselves. The failure in Mr. Tauber's book is that we don't feel any strong sense of these others; with occasional exceptions, they remain stereotypes. Still, a whole galley of char-

acters parades before us, like Mr. Chips's schoolboys. There is Billie McDonald, the 17-year-old

partner

Texan enlistee who becomes increasingly aware he has made a big mistake; Lt. Beep-Beep, the young ROTO second sequences, who bunglingly throws his weight around; Pvt. Tommy Lawson an arrogant Hitler-Youth type from North Carolina"; Pvt. Lorenso, "a howdy-doody-fared Italian-Mexican" who has the power to cloud sergesuis minds and render himself invisible when work details are being picket; and finally Pyt. Peyser, the com-pany basket case—fat, lazy, barely able to tie his own shoes and the constant butt of everybody's wrath. As a comic character poor Pvt. Peyser ranks up there with anything in Joseph Heller's imag. mation.

Indeed "Catch-22" would serve nicely as a concordance for The Cill Sunshine Soldiers" and Mr.
Tauber has a keen ear for Abbott and Costelloish dialogue:

"Who said that?" demands the CO looking straight at Leonnotto.

"I did." "I did, sir."

"I did, sir."

"Button your pockets."
"Button your pockets, sir."

The writings of Kafka and the open of existentialists also fit comfort, years ably, if vulgarly into Mr. Taubers 45. wh text Once the sergeant marched white off a group of men they knew the 5-3 not where and a kind of panic profile set in: "A necessary sense of plan of finitude and enclosure has ever- 16-5 in come us, and its absence the other dread feeling of endless pain and plan A nothingness, the sickness unto 14-6 6-6 death, has filled us with fear and 14-6 6-6 from the feeling of the sickness of the feeling in t

Armies are indeed basically 4-6.6alike, but Mr. Tauber's generation, conscripted to fight an un-157, 7-5 popular war, has added its own vintage year to the old model: Here are recruits who chant, WINSTO. "Hell no, we won't go," instead (AP--of "You had a good home but make it would be company out on the desert for an yeterd crawling exercise, and "200 men; finals o look at the sand and simply turned interior their neels and walk off." ipproximately the company of the sand walk off." when the CO says to his men at Frauld their final formation, "I'm proud their final formation," a "former kill-cray in Jame Teran" calls out, "Stuff it hair, a top-ra Tree CO does a prompt about it had of face.

Yet, when all is said and done is set 6.

Mr. Tauber's attitude toward his 1 U.S. I experience is a positive one. "Too 1. on eve many of my literal friends, and mes of the I. will not work and walk with ficher state people they are trying to it by set help or reach or meach to Main walk wid Solon help or reach or preach to May wid Solo be knowing that a sergeant's boot of ups controls your life can teach you a little about humility and compassion." He feels he has shared by Goo experience of a large part of his generation—being, in a limited Australy way "part of his time." And he h-Australy has passed through a kind of he has American rite de passage of grow- at the ing up. When he returns home is ample and Mom and Dad are there to illegan meet him at the airport, he il. Fes. thinks: "Hats off and hug your the Sid Mom, kiss the girls and get some (25ded) Coke. We're home." Home to 22 8-5. America, that is,

Palmer Captures Westchester Golf By 5 Shots at 270

HARRISON, N.Y., July 25 (AF):—Arnold Palmer fired a four-under-par 68 and today won golfs richest tournament, the \$250,000 Westchester Classic, by five strokes

The muscular 41-year-old finishunder par. Hale Irwin and Gibby Gilbert tied for second at 270. Gilbert, in second place start-ing play on the warm and muggy day, never got within two strokes of the front-running Palmer, and had trouble down the stretch to The 26-year-old Irwin, a former

Colorodu University football star had a finel-round 68.

Okker Gains Tennis Final WithDrysdale

LOUISVILLE, Ky., July 25 (AP).—Dutchman Tom Okker and South Africa's Cliff Drysdals yesterday advanced to the singles finals in the \$50,000 pro tennis

Okker, seeded fourth, disposed of Yugoslavia's Nikki Pilic, 6-3, 4-6, 6-2, while Drysdale, the third seed, whipped Australian Ray Ruffels, 6-3, 6-3.

Drysdale had beaten Dennis Ralston of Bakersfield, Calif., 3-6. 6-3, 6-3, in the quarterfinal round and Okker had ousted 20-yearold John Alexander of Australia, 6-1, 4-6, 6-2, Pilic had advanced past Roy Emerson of Australia. 6-2, 4-6, 6-3, and Ruffels eliminated Ismael al-Shafei of Egypt. 7-5, 5-7, 7-5.

Frantilovio Tops Belkin

WINSTON-SALEM, N.C., July 28 (AP).—Zeljko Pranulovic of Yugoslavia beat the rain and Canada's No. 1 player, Mike Belkin, yesterday to gain a spot in the finals of the \$25,000 Tanglewood International tennis classic Approximately 1 1/2 hours after Franulovic won, a sudden storm washed ont the Cliff Richey-Jaime Fillol match. Fillol, the top-ranked player from Chile, had defeated Richey in the

Fig., on even terms through ten games of the second set. Richey gained the semifinal spot by getting past countryman -Herold Solomon, 5-7, 7-5, 6-4, and Filler upset Pierre Barthes of France, 6-3, 6-4.

first set, 6-3, and battled the No. 1 U.S. player, from Sarasota,

Miss Goolagong Wins Title

LESCHETER, England, July 25 (AP)—Australia Evenne Goolagong won the women's singles title at the Midlands Lawn tenhis championships by defeating Patti Hogan of La Jolla, Calif.,

6-2, 6-1, yesterday.

Aussie Sidney Ball, 21, upset top-seeded Bob Hewitt of South

and incrediple Sam Snead, a 59year-old marvel, were tled for fourth at 277, 11 under par Snead and Reard

Snead and Beard each had final round 68s on the hilly 6.700-yard Westchester Country Club course. Tied at 279 were veterans Mason Rudolph, who had the day's best round at 65, Bobby Nichols and Larry Wood.

Jack Nicklaus, bothered by an cye infection and never really a factor in this event, rallied for a 67 and a 280, ten strokes back of

Paimer's victory was his third of the year—marking his best season eince 1967—and the \$50.000 first prize pushed his earnings for the season to \$164,000, third on the list this year.

It was the 58th career victory on the U.S. tour for the native of Latrobe, Pa., voted the athlete of the decade by the Associated Press a year ago.

Led Throughout

Palmer, who opened with a first-round 64, led throughout the 72 holes. He started the final round with a three-stroke ad-vantage, birdied the second from about 18 feet and was never seriously threatened.

Palmer, his position as golf's greatest attraction jeopardized by Lee Trevino's recent success, drew a huge and loudly enthusiastic gallery of followers who elipped over the rain-slickened hills. He gave them what they came for spectacular golf and the famous grin after a particularly good shot. On the 14th hole, Palmer appeared to be in danger of doublebogey five. He put his tee shot down a bank to the right, then moved it only about six feet with his second shot.

walked to the green, then came back, and, chipped ten feet past the hole.

He crouched over the putt and

ran it home for a bogey that still left him well in front. FINAL SCORES

Marko Wins in Lola T212

IMOLA, Italy, July 25 (UPI). Helmut Marko of Austria, at the wheel of a Lola T212, won both heats today and set a lap record in winning the fifth of nine races for the European twoliter sports car championship.

Marko circled the Imola track 56 times, covering 174 miles in 1 hour, 31 minutes 1.3 seconds to nip French driver Jean-Pierre Jahouille, driving an Abarth-2000, by less than eight seconds.

Carlos Pace of Brazil, piloting a March 712, won the Formula Two Race. He covered the 56 laps of the 174-mile course in a total two heat time of 1:30:57.6, an average of 114.788 mph.

Lakes region of New York State. He completed the 196 miles in 1 hour 32 minutes and 54.13 seconds for an averago speed of 123.58 miles an hour.

New Zealander Denis Hulme, senior driver for the British-based McLarens, came in a distant second, as a late pit stop put him more than 50 seconds back of his teammate. Jo Siffert of Switzerland drove a three-liter Porsche Spyder to third place. Top Bracket

Revson, aiready in the topmoney bracket of American driv-ers after a \$108,000 second-place finish in the Indianapolis 500, collected a total of \$17,800 from the \$75,000 in prize, qualifying and accessory money. Hulme's take was \$13,400, including \$1,000 for driving the fastest lap in the race—a 132.-276-mph. Siffert carned \$9,950.

Mario Andretti, of Nazareth Pa., driving a new seven-liter Ferrari that obviously will be a potent force in future Can-Ams, finished fourth. Tony Adamowicz of Torrence, Calif., was fifth in a veer-old McLaren-Chevrolet. Stewart Led Early

Pole-sitter Jackie Stewart of Scotland paced the 26 starters for the first 27 laps, his Lola-Chevrolet easily the fastest car in the race. But Stewart lost almost a lap changing a cut tire and came to grief for good on the 53d iap when a broken drive shaft brought him to a stop in front of the main grandstand, The Scot, who won the second

race in this series a month ago at St. Jovite, Quebec, gave the grandstand epectators a futile wave as he climbed from his

Track officials estimated the crowd at 75,000—making a total of 125,000 for yesterday's manufacturers' race and today's Can-

was the McLaren team's 32d triumph since entering the eerles at the start of 1967. It also was the team's 27th one-two finish in 36 races. Revson has now won two events and Hulme one in the four races this year.

Alfa Romeo Defeats Porsche In 6-Hour Watkins Glen Race

WATKINS GLEN, N.Y., July 23 (NYT).-An Alfa Romeo prototype won the Watkins Glen six hours of endurance yesterday on a rain-soated track, marking the third time this season the Italian make has defeated the West German Porsche in the world championship of manufacturers Alfa is the only car to have de-feated Porsche this year.

The winning 3-liter car was driven by Andrea de Adamich of Italy and Ronnie Peterson of Sweden, In the alloted six hours they covered 279 laps of the newly remodeled 2.4-mile Watkins Glen road course. The total distance was 677.4 miles average speed of 112.6 miles an

A pair of John Wyer's Gulf-Porsche 917K sports cars, which had already clinched the championship in May, placed second and third. The runnerup Porsche, which finished two laps behind the winner, was driven by Jo Siffert of Switzerland and Ghys Van Lennep of the Netherlands. The drivers of the third-place Porsche were two Britons, Derek Bell and Richard Attwood.

Ferrari 513 Is 4th

In fourth place was an inde-pendent Ferrari 512 sports car manned by Lothar Motschenbacher of Heverly Hills, Calif., and Alain Decadenet of England, Fifth overall and first in the Grand Touring class, was a Corvette driven by John Greenwood of Troy, Mich., and Bob Johnson of Marietta, Ohio.

The winning drivers shared a \$5,000 purse. Beli won a \$1,000 prize from the Ballantine Brewers for driving the fastest lap,

127.90 mph.

OFE CAME sed In The Carrie

There Was a Call From Churchill's Secretary_

By Thomas Quino Curtiss ONDON, July 25 (IHT).—One day shout ten years ago Carl Foremao, the producer-author of "High Noon." "Bridge on the River Kwai" and "Guns of Navarone," who makes England his home, arrived at his London office to find a message that Wloston Churchill's secretary had telephooed.

Suspecting a hoax, he threw the message slip into the oearest scrap-basket, cursed practical jokers and forgot the matter. Four days later his telephone rang and the operator told him that she was putting through a personal call.

"This is Anthony Montague Brown, Winston Churchill's sec-retary, speaking. My boss wants you," said someone in clipped tones. "Boss" sounded suspicious, but the voice was unmistakably British. Mr. Foreman decided to risk making an ap-pointment and next day found himself face to face with Chur-

Suggests Film

Churchill, it developed, was a movie fan and particularly admired Mr. Foreman's "Guns of Navarooe," which he had had projected several times in his dining room.

'It seems to me that the time is ripe for a film about my youthful adventures and that you are the man for the job," Churchill informed him, Mr. Foreman came away from this first interview with a copy of Churchill's book, "My Early Life," read it carefully and purchased the screen rights. He wrote a script and submitted it for the anthor's verdict. Churchill was pleased with the adaptation and asked: "Now when

shall we see it?" Mr. Foreman explained that the filming would require more than a year, perhaps two or three, and compared the making of a movie to a military operation, "But in the Second World War we took the Continent in le's time." grumbled Churchill.
"Yes," allowed Mr. Foremen, "but you had more money and men."

10 Years Later

Foreman has been traine to

ments: He went to Kenya to make the wiid-life "Born Free" and its sequel, "Living Free"and there has been studio opposition to expensive spectacles. Now, almost a decade later, "Young Winston" is at last hefore the cameras. At the moment the scenes of Churchill's childhood, school days, early years in the London social whirl and election to Parliament are being shot al the Shepperton Studios. Last month the company visited Swansea in Wales for the Boer War sequences, location experts having found plains and hills resembling those of South Africa. In September, cast and crew will go to Marrakesh for six weeks to film the Indian and Sudan inter-

hudget to which Columbia agreed is \$6 millioo, high but far less than those of many spectacles," said Mr. Foreman.

"Being both writer and producer. I bave entrusted the direction to Richard Attenborough, whose first film, 'Oh What a Lovely War, impressed me greatly. It had both convincing period atmosphere and a dynamic style. Attenborough is a fine actor and originally thought of him for the role of Churchill seven or eight years ago."

Another Story

The screenplay has been revised since Churchill read it in

outline. "I found another story beneath the surface account of early ex- spurred his determination to periences, the key, I believe, to the seeming cootradictions in Churchill's personality and career. Winston was a shy, timid, delicate child whose adolescence was dominated by his aloof, contemptuous father—the brilliant, erratic Lord Randolpb. At 18, Churchill relates, they had had only four serious conversations together. A lonely boy, he sought in vain his father's affection and approval. He adored his mother, the American-born heiress, the former Jessie Jerome, hut she was as remote as a beautiful goddess. After her husband's death, she married a man only 18 months her son's senior. Another emotional blow must have

Simon Ward as the young Churchill in the film of the same name.

These deep psychological conflicts hammered Churchill into greatness, I believe," continued Mr. Foreman. "They developed his pugnacious self-reliance and succeed, to seek adventure and advancement. The film is not a glorification, but an attempt at explanation, a study of character formation. It traces Churchili from a troubled childhood to his galning of streogth and courage. Upon his father's death he sprang to life as an aggressive officer, journalist and politician. We end with his first important speech in Parliament when he was 28. His future as a man of destiny is foreshadowed. No. I shan't do a sequel. This is the story I want to tell."

End of an Age

The scenario explores the last days of the Victorian age, the nineties: Picturing the English

aristocracy in a world they ruled with seemingly indifferent ease, it recalls the time of "old-fashioned" heroics on the battlefield, bringing back the long-lost names of the Northwest Indian frontier, Malakand field force, the battle of Omdurman, Boer War, Bengal Lancers (with champagne lunches between cavalry charges). Lord Salisbury, Chamberlain, Balfour, Lloyd George, Gen. Kitchener (all of whom played important roles in young Churchill's life;

are among the dramstis personae. Robert Shaw, the sctor-novelistplaywright, with several elaborate make-ups, a repertory of whisk-ers and wigs, is playing Lord Randolph and Anne Bancroft is the Virginia beauty who was Churchill's mother, Miss Bancroft is an infrequent film actress, last seen as the predatory Mrs. Rob-insoo in "The Graduate." She won an Oscar for "The Miracle Worker' and the British best foreign actress award for "The

Pumpkin Ester," but Mr. Foreman had to fly to New York to coovince her to make another movie. The casting of Winston Churchill presented a major problem. A talented child actor, Russell Lewis, impersonates him as a little boy, seot to a harsh school at 7, but the chief role is Winston in young manhood between 18 and 26. Several actors whom

Mr. Foreman had in mind when he wrote the original script in 1962 are now too old. The matter has been happily solved with the selection of Simon Ward, a blue-eyed, sandy-haired, fine-featured player who has risen to prominence on the London stage recently. In Peter Ustinov's opinion, Simon Ward is the most gifted younger actor in England, and many criticsincluding this one-see him as the heir to Burton, O'Toole and

Now 28, he was born in Beckenham, Kent, and educated at becomes a star.

Miss Lebanon Is New Miss Universe

from Beirut, Lebanon, was named Miss Universe Saturday night in Miami Beach. First runnerup was Toni Rayward of Sydney, Australia; second runnerup was Pirio Laitila of Helshiki; third runnerup, Beba Franco of San Juan, Puerto Rico, and fourth runnerup Elaine Parreira of Mariana, Brazil.

In London he has given performances of distinctive individuality in Joe Orton's macabre "Loot" and in two Simon Gray plays, "Wise Child" and "Spoil-ed." All three roles were of s bizarre nature and he was in danger of being type-cast, but those who have seen him in "The Sunday newspaper. Ray Bellisario Unknown Soldier and His Wife." and Browning's "Pippa Passes" at Oxford a year or two ago can testify to his wide histrionic alleged he had been refused press passes for the Badminton horse trials—which are attended by royalty-because of Lord Snowdon's objections. The union said it would eet up a committee to decide whether Snowdon, 41-year-old husband of Princess Margaret. was guilty of professional misconduct. Drive and Force

Ward's own acting combines a striking sensitivity and driving inner force. Intellect is apparent in his characterizations, but he has, too, that indefinable quality that holds the spectator's attention whenever he is on the stage. He also has the transforming powers of the true actor. Now in his late 20s, he played an adolescent schoolboy convincingly in "Spoiled" last March.

He bears perhaps another feat of transformation—a remarkable resemblance to the photographs of Churchill in the 1890s and has something of the Churchillian puck. He endured six screen tests to win the role, waiting anxiously while his tests were exactingly compared with those

of other contestants. When director Richard Attenborough telephoned him that the part was his, he said: "I thought I'd missed it." "Missed this picture?" inquired Attenborough. "No, missed the movies."

Unaccountably, the cinema has hitherto ignored him and he has had only one brief bit in n film. Now, however, he has a contract for five films with Carl Foreman. With "Young Winstoo" he
